## Your Contracts. Evolved.

## AI-Driven Contract Management for your Staffing Business

IntelAgree is an end-to-end contract management platform powered by AI. Our machine learning reads key terms, clauses, and dates in your contracts so your team can focus on impactful work, not busy work.
## Proud to be a Bullhorn Marketplace Integration Partner

### Get Unlimited Users, E-Signatures, Templates, & Storage

Support your company's growth with a contract management platform that scales and adapts to your evolving needs.

### Improve Contract Visibility for Companies and Placements

View all contractual relationships with a company or placement. See key details like contract names, contract types, statuses, effective dates, and expiration dates.

### Accelerate Sales Cycles with Faster Contract Creation

Create and populate new contracts with existing data from Bullhorn. Plus, import third-party paper or upload executed contracts to instantly identify key terms and clauses.

### Access Real-Time Information with Two-Way Data Sync

Leverage our machine learning algorithms to find contract data like standard perm fees, payment terms, bill rates, and more. That data is available real-time in Bullhorn so you can see what may have changed during negotiations.

## Decades of Experience. Proven Track Record.

We're the team that developed Bullhorn's eStaff365, the first cloud-based employee onboarding system built exclusively for the staffing industry.

Today, we're helping staffing companies accelerate their contract management with IntelAgree.

# Why IntelAgree?

### Reduce risk with complete visibility into your agreements

Use our searchable repository, contract summaries, and custom dashboard to get a comprehensive view of your agreements. Plus, with free text and advanced structured search capabilities, you can instantly identify areas of risk and discover opportunities to negotiate more favorable terms.

### Optimize the contract review process with machine learning

Our machine learning can identify, extract, and analyze key terms and clauses, adding efficiency to the negotiation process. Choose from standard "built-in" models or create your own, so you can find what you're looking for no matter your industry or contract types.

### Boost efficiency with intelligent automation

Intelligent workflow automation enables you to know where a contract is in its lifecycle—whether it's awaiting internal approvals, in negotiation, stalled, or awaiting signatures. And with approval workflows based on contract terms and types, you can route the right information to the right teams at the right time.

### Improve productivity with our add-ins

With our Word, Outlook, and Chrome add-ins and extensions, you can quickly create, negotiate, search, and upload new versions of contracts—all from the tools you're already using today.

### Get enterprise security & scalability with the cloud

Our Azure-based solution not only meets SOC 2 compliance standards, but it also supports secure and regular software releases. Our platform is accessible from anywhere, so you can get mission-critical contract information whenever you need it.
