

WALKER
out front mowing

D series

walkermowers.com

- 20.9-HP, Kubota three cylinder diesel engine, liquid-cooled
- Electric radiator fan with automatic reversing self-cleaning action
- Shock-mounted instrument panel
- Remote air intake for engine
- 10.0 bushel (12.4 cu. ft.) catcher
- 10.5" (27 cm) grass handling blower
- Splined PTO drive shaft with quick-disconnect coupler
- 4.7 gallon (17.8 liter) fuel tank
- 7 mph (11.3 kph) ground speed
- Grammer suspension seat
- Available in Side Discharge (SD) model
- Tilt-open style body and chassis
- 40-amp high capacity electric system

D21d

out front Advantage

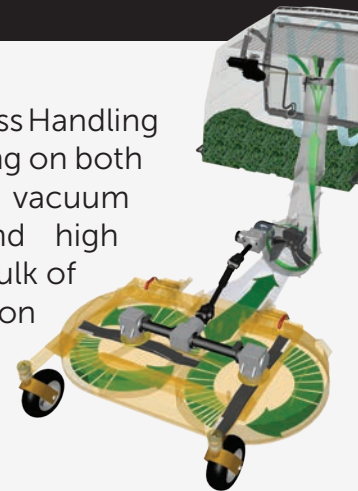

Beautiful Cut

A well-manicured lawn is a beautiful thing, and Walker's well balanced mowers, combined with our floating decks, have a gentle footprint that insures a clean, beautiful cut every time.

With true deck suspension, Walker decks float and flex over the turf, easily following ground contours. The result is less scalping and a clean, manicured finish. Because the weight of the deck is transferred to the drive wheels, there is less surface pressure on the deck caster wheels, which means reduced impact on the turf - and a beautifully striped lawn.

Grass Handling

The exclusive Walker GHS (Grass Handling System) offers precise trimming on both sides of the deck, powerful vacuum action, clog resistance, and high capacity design without the bulk of typical grass catchers found on other mowers.

Best Seat in the House

With a full view of the area to be mowed and an operator position at the center of the machine—you have the "Best Seat In The House."

- Full view of working area
- Low center of gravity maximizes tractor/operator balance and provides excellent hillside performance
- Out front deck gives improved reach under fence lines and overhanging bushes and shrubs (less trimming)

Versatile

Walker's out front design lends itself nicely to the use of a variety of attachments, keeping the tractor busy all year long. The Walker is on the job, getting work done through summer, fall, winter and spring. Walker Mowers can be adapted in just minutes to multiple grounds maintenance uses with front mounted attachments and implements.

The out front design also makes it easy to switch between Walker's eighteen different decks, which vary in size and configuration.

A favorite tractor for municipal, institutional, and government customers is the MD. This is in part because of the powerful Kubota, three-cylinder, liquid-cooled diesel engine producing long life and better fuel economy. One innovation highlight of the D21d is a self-reversing fan to keep the radiator clean. The D-series shares the same basic design as the T-series and is capable of using most of the decks, implements and attachments built for the grass collection style machines.

Exclusive Easy Operating Controls

Two steering levers work in conjunction with the Forward Speed Control (FSC) to control the drive wheels for easy, smooth operation

Deck Counterweight Springs

Transfer weight from the deck to the drive wheels, maximizing traction and agility

Steel Body Shell

14 gauge body with welded steel construction

Tilt-Up Deck

Makes blade and deck housing maintenance quick and easy

Welded Deck

Rigid deck design with 11 gauge steel deck housing and tubular carrier frame

Cutting Blades

Durable steel alloy blades are specifically designed for the Walker deck and contribute to the overall performance and finished cut quality

Easy-Change Drive Belts

Change belts in the field with no tools

Grass-Pak™ Full Signal Switch

Automatic signal horn warns when the catcher is full and ready for dumping

Powerfil™

Oscillating delivery spout evenly packs the catcher full, even when grass is long or wet

Low Profile Grass Catcher

Molded polyethylene catcher (high impact plastic) with 10 bushel capacity; back door is hinged for tailgate dumping

Comfortable Operating Position

Large contour molded seat is matched with natural and intuitive control placement and full view of mowing area. Comes standard with suspension seat and armrests

Industrial Grade Diesel Engine

Diesel engine is exhaust emission certified and has full pressure lubrication including oil filter

Dual Hydro Axle

Combination of hydrostatic transmission and custom gear axle provide a durable and precise drive unit for each wheel

Hi-Dump™

With the optional Walker Hi-Dump™ (shown) or Power Dump (not shown), emptying a full catcher box is as easy as flipping a switch.

GREAT FOR LEAF AND DEBRIS CLEAN-UP

Accessible

It's unavoidable that commercial lawn mowing equipment needs routine maintenance like blade sharpening, engine oil changes, and belt changes.

The Walker Mower was designed and built to be easy to maintain, and provides quick, easy access to serviceable parts.

A tilt-open body quickly exposes the engine and drivetrain, while the tilt-up mower deck makes blade maintenance and deck cleaning a quick and easy task.

Agile

The Walker's easy-to-use steering configuration is a distinct design characteristic that improves agility versus competitive machines.

While other mowers use lap bars and arm movements to steer, the Walker uses a forward speed control/ cruise control and gentle fingertip pressure on the steering levers to precisely maneuver the machine while decreasing arm fatigue.

Engine Specifications	D21d
Manufacturer/Model	Kubota D722, 3 cyl.
Displacement	719cc (43.9 cu. in.)
Max Power	20.9 hp @ 3600 rpm
Max Torque [ft-lb]	34
Fuel	Diesel (2-D)
Fuel Capacity	4.7 gallons (17.8 liter)
Cooling System	Liquid, Radiator
Lubrication System	Full Pressure with Filter
Muffler	Engine Tuned
Tractor Drive	
Transmission/Final Drive	Dual Hydrostatic Eaton Model 7, Each Wheel Independently Driven
Steering	Hand Lever Control, Individual Drive Wheel
Forward Speed Control	Precision Friction Lock Lever, Cruise Control with Neutral Park Position
Brake	Dynamic Braking through Hydrostatic Transmissions
Parking Brake	Mechanical Pin Lock in Transmission Gear
Ground Speed	0-7 MPH Infinitely Variable
Turning Radius	Zero (0")
Mower Deck	
Cutting Width	36 to 74 (18 Decks)
Cutting Height	1 to 4 (2.54 to 10.16 cm), 1/2" (1.27 cm) Increments
Blade	0.197 inch Stamped Steel, 10B38 Alloy, Tempered
Maximum Blade Speed	2900 RPM (16700 FPM with 22" Blade)
Blade Drive	Spined PTO Drive Shaft/2 High Speed U-Joints, Shear Pin for Shock Protection on Timed Gear Drive on Deck
Blade Clutch/Brake	Manual Belt Tightener/Band Brake
Deck Suspension	Torsion-Flex Frame with Caster Wheels and Counterweight Springs
Dimensions	
Outside Dimensions'	49" H x 49" W x 91" L
Wheel Base [Tractor]	42.25 in.
Tractor Width [Outside Drive Tire] **	39.25 in.
Curb Weight (Approximate)	
Tractor Only	959 lbs.
Tractor and Deck'	1170 lbs.
Compatibility	
Decks	DC36R, DC42, DC48, DC48R, DC52R, DS36, DS42, DS42 (Belt), DS48, DS52, DS56, DS62, DS74, DM36, DM42A, DM42B, DM48
Add Ons	Single Stage/Two Stage Snowblowers, Dozer Blades, Rotary Broom

*Dimensions and weight shown for models equipped with 48" deck ** With standard 9.5" drive tire (ST7070)

Service Commitment

As a Walker owner, you can expect to receive the highest quality performance from your product and matching service from the local dealer where you made your purchase. Walker Mowers are sold by independent dealerships who understand the Walker line and agree to follow Walker's Sales with Service commitment to our customers. Dealers are established by independent distributors who are backed by Walker Manufacturing Company. Walker is an independent, family-owned, manufacturer of high quality, American-made, power equipment products since 1980.

Warranty

Today, it is popular to talk about "lifetime" warranty, but what really matters is how that promise is kept. We don't use warranty as a gimmick to sell our product – rather, we use it as a promise to stand behind our workmanship. Walker aims to use warranty as it is meant to be used: helping customers get back to work quickly in the event of a manufacturer's defect or failure of workmanship. At Walker Manufacturing, our warranty is our word.

1
YEAR

- All parts and components against defects in materials or workmanship

2
YEAR

- Kubota administers their own 2-year full engine replacement warranty

3
YEAR

- Hydrostatic transmission and gear axle drive
- Kubota administers their own 3-year engine parts replacement

For a zero turn mower to excel at its work, its design has to be right from the start, or it will be easily lost in the wide array of commercial mowers that deliver only marginal results. Walker's design philosophy consists of discipline, ingenuity and no compromises. Through three generations of the Walker family, each Walker model has been built from the inside out to achieve a balance of durability and performance.
