FOR IMMEDIATE RELEASE

RMC Introduces HDA-6600 – Low Foaming Descaler

March 30, 2016, Rochester, NY. The RMC Food Safety Division is introducing HDA-6600, a low-foaming formulation of acid and surfactants designed to handle descaling difficult-to-clean oxalate and calcium scales found with processing fruits and vegetables, grains, chocolate, beer, dairy and many other foods. It is also very effective in removing hard water scale. HDA-6600 provides sustainable solutions with its distinctive properties which allow for an accelerated cleaning action.

The RMC BrandGuard[®] Program reflects our commitment to food safety and providing sustainable solutions in the areas of reduced energy and water, improved safety and improved cleaning time. HDA-6600 uses less water, is gentler on metals and breaks down to sulfate and CO₂.

RMC, founded in 1888, is a leading manufacturer of specialty chemicals for food sanitation, industrial cleaning and water treatment as well as specialty institutional cleaning and personal care products. Our HACCP-based BrandGuard Program offers solutions to food manufacturers across all aspects of food safety including brand protection and sustainable solutions. Rochester Midland is the leader in Green Housekeeping and manufactures Enviro Care[®], an extensive line of environmentally preferable products for all markets, as well as many other bio-based products. For more information on the BrandGuard program, please contact Lauri Calarco @ 585-336-2310 or lcalarco@rochestermidland.com.
