Creating Lasting Connections Through Collaboration

Technology is your organization's engine for success. Beyond creating the critical framework to accelerate operational excellence, technology offers the potential to create competitive differentiation. Innovation is a strategic imperative. How well does your organization leverage technology currently in place to maximize value while maintaining the flexibility necessary to take advantage of today's rapidly expanding technology capabilities and benefits?

Creative Technology Solutions

NVISIA is a software development partner with a 25-year history of applying creative technology solutions to address business challenges. Creating lasting connections through collaboration, NVISIA partners with clients to ensure their ability to stay out in front of business demands with pragmatic and adaptive technology.
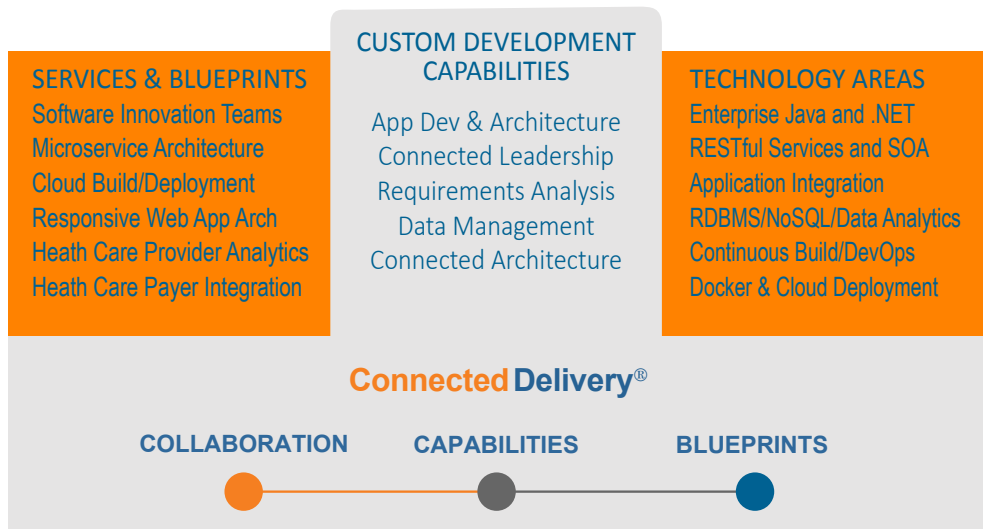

Unlocking Value

NVISIA's custom solutions help clients unlock strategic and operational value from existing technology investments and improve both existing technology effectiveness and efficiency. NVISIA assessments and blueprints deliver verified, actionable plans for successful software innovation that connects people, process and technology.

With a reputation for excellence, NVISIA:
- Provides small teams of practitioners to rapidly deliver highly integrated solutions
- Mentors client teams from day one to assure long-term ownership resides with client teams
- Maximizes the use of existing technology investments
- Provides innovation team leadership to drive the build-measure-learn process
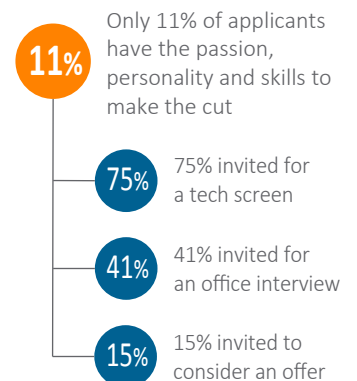

Integrated Delivery Model

NVISIA integrates a full menu of capabilities with deep technological expertise to deliver innovative solutions for healthcare, insurance, financial services, manufacturing and government service industries. Cross-platform services help clients assess needs, develop applications and strategically plan to achieve efficient, effective technology advancements across the enterprise.

2015 PROJECTS

95% 95% of NVISIA's 2015 projects came from past relationships

61% 61% **repeat** business

34% 34% **referral** business

5% 5% of NVISIA 2015 projects came from the **thought leadership** community

3% 3% Development Community

2% 2% Business Partners

2015 RECRUITING

11% Only 11% of applicants have the passion, personality and skills to make the cut

75% 75% invited for a tech screen

41% 41% invited for an office interview

15% 15% invited to consider an offer

SERVICES & BLUEPRINTS
Software Innovation Teams
Microservice Architecture
Cloud Build/Deployment
Responsive Web App Arch
Heath Care Provider Analytics
Heath Care Payer Integration

CUSTOM DEVELOPMENT CAPABILITIES
App Dev & Architecture
Connected Leadership
Requirements Analysis
Data Management
Connected Architecture

TECHNOLOGY AREAS
Enterprise Java and .NET
RESTful Services and SOA
Application Integration
RDBMS/NoSQL/Data Analytics
Continuous Build/DevOps
Docker & Cloud Deployment

Connected Delivery®

**COLLABORATION**   **CAPABILITIES**   **BLUEPRINTS**

Working with NVISIA

Bottom line, you want rapid delivery of critical software that works in concert with existing business process, systems and data. Strategic software innovation requires collaboration, craftsmanship and engineering, but we also add creativity, skill and a deep understanding of emerging technologies to deliver a solid solution fast.

NVISIA's ConnectedDelivery® services are a proven pattern for connecting systems and data with business objectives, and quickly delivering a business-aligned solution. It's the roadmap for building your highly-integrated software platforms where we combine our 25 years of expertise with the agility of a start-up. As a result, you get accelerated delivery of important software, with leading technologies, and a high degree of integration with existing code, systems and infrastructure.

Transform Software Platforms and People Who Build Them

With our collaborative execution model, we embed our experts with your team for joint accountability, knowledge sharing and accelerated delivery.

The result is hands on, highly-productive mentoring and transfer of ownership from your development partner to your lower cost staffing, in house or offshore resources.

Relative Resource Cost

- Global Strategy
- Product Specialist
- **Development Partner**
- 1099/Staffing
- In House
- Offshore

Transfer ownership to lower cost resources

Unleashing Core Systems with Emerging Technology

NVISIA specializes in using emerging technology to connect core business systems in innovative ways. Here, innovation flows freely while the integrity of your core business systems are preserved.

Innovation Layer

Responsive, Single Page Applications
(responsive design through HTML5 using Twitter bootstrap and zurb foundation and JavaScript Frameworks (Backbone.js, AngularJS, Ember.js knockoutJS)

Cloud, Mobile & Big Data
(AWS, Android, iOS, Data Grid,Redshift, Big Data Analytics)

Differentiation Layer

Web Services
RESTful Services
DevOps w/containers

Enterprise Java
(Spring, Struts, etc)

Enterprise .Net
(C#, ASP.NET MVC, WebAPI, etc)

Node.js platforms

Connecting Technology

Operational Layer

ZOS mainframe-based, Windows, Unix and Linux platformed applications

Database technologies
(DB2, SQL Server, Oracle, NoSQL, Teradata, Sybase, Mongo...)

Enterprise technologies
(Enterprise content management, rules engines, workflow)

ASP.NET	FOP	IIS	LambdaJ	PicketLink	Spring (Batch, Boot, Data
ASP.NET/MVC	Git	InRule	Liquibase	PostGIS	Security and Web services)
AWS	Gradle	Jackson	MarkLogic NoSQL	Puppet	SQL Server
BIRT	HTML5	Jasper Reports	Maven	QUnit	Struts
Crystal Reports	IBM CICS (CTG)	JBoss	Mockito	RabbitMQ	Sybase
CVS	IBM DB2 (AIX)	JBoss Seam	Node.js	Redmine	Teradata
Docker	IBM DB2 (Z V10)	Jenkins	OpenLayers	RESTful Services	WebSphere (AIX & zOS)
Drools	IBM MQSeries	Jetty	PicketBox	Selenium	WebSphere Portal (AIX)

ABOUT NVISIA?

Founded in 1991 as STR, NVISIA has built a reputation for developing enterprise solutions with leading edge technology. As innovators enabling the early adoption of corporate networks, NVISIA founders came to understand the value of distributed computing for business software. With numerous Fortune 500 clients, the firm was able to develop a deep appreciation for an emerging paradox: adding competitive advantage with custom enterprise software while at the same time managing the risks associated with leading edge technology. To manage risk and complexity, NVISIA's founders used standards-based, object-oriented technology coupled with an iterative development process to provide an effective means to rapidly deliver applications while managing risk. This approach became the foundation for NVISIA ConnectedDelivery® services.
