

FUNCTIONAL STATUS SUMMARY (9/15/2016)

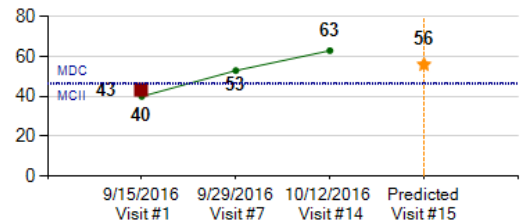

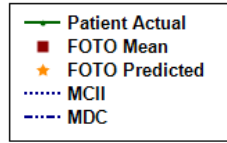

Patient: PATIENTS, SAMPLE
ID# MR1234567
Date of Birth: 10/10/1950
Initial DOS: 9/15/2016
Body Part: Hip
Impairment: Post-surgical procedures: Musc...
Surgery Type: Total Hip Arthroplasty
Surgery Date: 09/07/2016

Risk-Adjustment Criteria			
Care Type:	Orthopedic	Gender:	Male
Body Part:	Hip	Comorbidities:	Two or Three
Severity:	Severe (Intake FS: 40)	Payer:	Medicare B
Age:	66	Fear Avoidance:	Low
Acuity:	22 - 90 days	Surgery Status:	1 or more

Function Status Measures:	Intake Score	09/29/2016 Score	10/12/2016 Score	Interpretation of FS Scores/Stages Value
Patient's Physical FS Primary Measure	40	53	63	Patient's Intake FS Score was 40 initially placing the patient in Stage 3 . Patient's FS score now is 63 out of 100 (23 points of functional change since intake), placing the patient in Stage 5 and means patient is an active community ambulator.
Risk Adjusted Statistical FOTO*	43			Given the patient's risk-adjustment variables, like-patients nationally had a FS score of 43, Stage 3 , at intake.

MCII = 6 (Points of change that is important to the patient)

MDC = 7 (Represents the smallest threshold to identify points of change that is greater than measurement error)

Additional Items	FOTO Mean at Discharge	09/29/2016 Value	10/12/2016 Value	Interpretation of Predicted Value
Points of Physical Change	16	13	23	<div style="border: 1px solid black; padding: 5px;"> <p>Given this patient's risk-adjustment variables, and the actual Intake FS score, FOTO predicts this patient will experience at least an increase in function of 16 points (to 56 or higher), putting them in the Stage 4 level or higher at discharge.</p> <p>Stage: 1 Physiological ambulator Stage: 2 Household ambulator Stage: 3 Limited community ambulator Stage: 4 Independent community ambulator Stage: 5 Active community ambulator</p> </div>
Visits	15	7	14	
Duration in Days	55	14	27	
Satisfaction	98.8%	96.9%	100.0%	

What Does This Mean For Improving Function

This chart displays the patient responses to the functional activities contained in the intake survey that generated the intake FS score. The activities are presented in the descending order of difficulty. Responses listed in the Intake column are the survey item levels of ability at intake. Responses listed in the Intake column are the survey item levels of ability at intake. Given the change experienced by the comparative risk adjusted group in FOTO's data, it is anticipated the patient should be able to do the activities at the level indicated in the predicted column or higher at the completion of care, to place the patient in the predicted **Stage 4** functional level by discharge.

Patient responses to functional health questions that indicate dysfunction were as follows:

Activity (Question)	Amount of Limitation (Response) at:			Functional Limitation
	Intake	Status	Predicted	
Running on uneven ground?	--	Moderate difficulty	Moderate difficulty	Mobility - G8978
Making sharp turns while running fast?	--	Moderate difficulty	Moderate difficulty	Mobility - G8978
Running on even ground?	--	Moderate difficulty	Moderate difficulty	Mobility - G8978
Hopping?	--	A little bit of difficulty	Moderate difficulty	Mobility - G8978
Performing heavy activities around your home?	--	No difficulty	A little bit of difficulty	Other PT/OT Primary - G8990

FUNCTIONAL STATUS SUMMARY (9/15/2016)

Patient: Patients, Sample (MR1234567)

Primary Body Part: Hip

Initial DOS: 9/15/2016

Patient responses to functional health questions that indicate dysfunction were as follows:

+ Getting up or down 10 stairs (about 1 flight of stairs)?	Quite a bit of difficulty	No difficulty	No difficulty	Mobility - G8978
Getting into or out of a car?	Moderate difficulty	--	No difficulty	Changing & Maintaining Body Position - G8981
Performing light activities around your home?	Moderate difficulty	--	No difficulty	Other PT/OT Primary - G8990
Getting into or out of the bath?	Moderate difficulty	--	No difficulty	Changing & Maintaining Body Position - G8981
Putting on your shoes or socks?	A little bit of difficulty	--	No difficulty	Self Care - G8987

If the patient reaches the anticipated level on the above activities, other **Stage 4** activities the patient should be able to perform include:

- Walking two blocks - No difficulty
- Lifting an object, like a bag of groceries from the floor - No difficulty
- Your usual work, housework, or school activities - A little bit of difficulty
- Walking between rooms - No difficulty
- Squatting - A little bit of difficulty
- Your usual hobbies, recreational or sporting activities - A little bit of difficulty

Additional Intake Information Gathered for the Clinician

- **Physician Referral:** Physician Referral: Sample Physician
Employer Referral: John Doe Employer, Inc.
Insurance Referral: America PPO
- **Prescription medicine for this condition:** No

Patient Satisfaction Summary for 10/12/2016:

- I am very satisfied with the information given about my condition.
- I am very satisfied with my input in setting treatment goals.
- I am very satisfied with the availability of convenient appointments.
- I am very satisfied with the access to the facility location.
- I am very satisfied with the level of courtesy and respect shown to me by my treatment team.
- I am very satisfied with the treatments for my condition.
- I am very satisfied with the overall results of my treatment.
- I would tell a friend that I was very satisfied with my experience at this facility.
