Boilers

The York-Shiplely brand is respected the world over as a manufacturer of the highest quality boilers, burners and accessory equipment. York-Shiplely Global provides one of the largest lines of boilers and ancillary boiler room equipment to meet the most stringent and current environmental requirements, as well as applicable codes and standards. No other boiler manufacturer today can offer the engineering innovation and range of supplemental products as York-Shiplely Global. We stand behind our products and strive for unsurpassed customer service and satisfaction, before and after the sale.

VAPOR POWER INTERNATIONAL

Vapor Power boilers are built to withstand the rigorous demands of daily boiler operation. Our boilers are built to the highest quality standards and exacting codes such as ASME, IRI, FM, U.S. Coast Guard, ABS, CGA, and Lloyd's Registry. We use the most advanced production technology to further ensure superior quality of our boilers.

The most versatile steam boiler in the world with capabilities of going from a cold stand-by status to steaming conditions in 5 minutes and has one of the smallest footprints in the industry. LOW NOx steam and hot water boilers meet and exceed current and proposed regulations for nitrous oxide emissions levels, as low as 20ppm NOx at 3%, corrected O2.

Smith Cast Iron Boilers are known throughout North America for their rugged reliability, operating efficiencies and longevity. Our products range from small residential boilers to the largest cast iron commercial boilers available in North America. Typical applications range from homes and apartments up to very large institutional buildings such as schools, universities and government buildings.

All Smith boilers are in compliance with A.S.M.E. standards for safety, and all capacity and efficiency ratings independently I=B=R certified by Hydronics Institute of GAMA

Columbia dates back to 1936 and specializes in vertical tubeless, 3-pass and Scotch Marine boilers. Hydronic units include models and sizes for every commercial and industrial application.... with distribution worldwide. Columbia boilers have proven to be top quality and extremely reliable for over 70 years.

RBI offers the most complete line of finned copper tube boilers and water heaters available today. Models are available to fit any commercial application, from atmospheric to fan-assisted sealed combustion in a wide 100,000 to 4,000,000 BTU capacity range.

Watertube package systems that are custom designed to meet your requirements. WARE can include burners, controls, economizers, stacks, deaerators, and other auxiliaries. Boiler sizes range from 20,000pph to 250,000pph up to 850psig and 850F.

HydroTherm

Hydrotherm has provided innovative solutions for the ever changing comfort needs of commercial boiler applications. Hydrotherm pioneered the modular boiler concept which provides maximum efficiency and flexibility in commercial heating applications. These 300 BTUH modules eliminate the energy-wasting "all on/all off" firing sequence of single-input boilers by step firing to match heating demand. Our cast iron Multi-Temp modules or higher efficiency Multi-Pulse modules can be configured to meet the load requirements of any institutional application.

Firestorm heaters are designed to heat water for a wide variety of business operations. They provide a constant supply of hot water for clean-up operations. And they provide heated water used in the manufacturing process of many products.

Vertical Tubeless and Pulse boilers offer the most complete solutions for steam and hot water for every type of industrial application. Steam boilers are currently available in sizes ranging from 4BHP -150BHP. PulsePak boilers are available in a wide range of sizes from 300,000 Btu/hr - 2,000,000 Btu/hr. Customized thermal fluid heater systems to meet your heat transfer needs. ASME stamped heaters are available to 14,000,000 Btu/hr and temperatures to 750°F.

In most endeavors it is a well known fact that the BASICS must be mastered before something special can emerge. The same can be said about boilers. The flexibility of our designs promotes one of the broadest ranges in the industry. To go from low and high temperature water to low and high pressure steam, you've got to have a proven design.

All Beacon-Morris products are manufactured with pride in the U.S.A. The Twin-Flo kickspace heater line leads Beacon-Morris' fine family of residential and commercial heating products. Their other products include convectors, gas & hydronic unit heaters, floor vectors, cabinet unit heaters, and commercial finned-tube. The entire Beacon-Morris family of heating products delivers the quality, value, and performance expected from the inventor of kickspace heaters.

Reimers Electra Steam has been manufacturing electric boilers, electric steam generators and quality steam products since 1908.

Electric boilers are flameless and safer. This eliminates the risk of flashback, firebox explosions, and smoke damage.

All boilers are built in accordance with requirements of the ASME boiler and pressure vessel code ASMECS-1 and bear the national board stamp (CSA + CRN Available).

Unilux Boiler Corp., they engineer and manufacture bent water tube boilers of only the finest quality, built by experienced craftsmen and backed by a service history that is second to none.

Valves

Crane Valve Group provides process fluid control products to industries worldwide. The products manufactured are sold under widely specified brand names that are among the most recognized in the industry. The products are used in a variety of applications ranging from simple to severe in industries such as Power Generation, Hydrocarbon Processing, Chemical Processing, Cryogenic Services, Marine, Biopharmaceutical, Mechanical Construction, Biofuels, and Liquefied Natural Gas (LNG).

Samson manufactures industrial control valves; self operated regulating valves and an extensive range of process instrumentation, especially valve management accessories.

All products are manufactured and recognized standards with quality approval to ISO 9001.

Recognized as a global leader in the design and production of valves and control systems for heat and process fluid control, Gestra products and services provide a full line of steam solutions for all commercial and industrial applications where steam is generated, distributed, or used.

Centerline has been a market leader in quarter turn resilient seated butterfly valves for more than 40 years. Centerline offers the following features; qualified for both gaseous and liquid services, positive shut-off bidirectionally, phenolic backed cartridge seat, field repairable 2" to 24" and available in sizes 2" through 48"

Duo-chek High Performance wafer check valve. Duo-chek offers the following features, non-slam design, ASME pressure class 125 through 2500, Wafer, lug and double flange designs available in sizes 2" through 24"

Revo Pneumatic Rack and Pinion actuators. Revo offers the following features: torque capacity to 100,000 in-lbs, standardized valve to actuator interface per DIN ISO

5211, position indicator per Namur standards, Aluminum body with anodized surfaces

Flowseal is a leading provider of soft seat, metal seat and fire-safe high performance butterfly valves.

Flowseal offers the following features: bidirectional bubble tight shut-off, self energized seat design, ANSI class 150, 300 and 600, available in sizes 2" to 48"

Burners & Controls

Power Flame manufactures gas, oil, combination gas and oil, low NOx burners and combustion control systems for commercial, industrial and process applications.

The reliable, economical and highly efficient burners produced by Power Flame are as remarkable in their differences as they are in their similarities.

TODD products have earned a reputation for exceptional reliability and die-hard performance under the most punishing conditions. TODD® combustion systems have serviced the heating, power generation, chemical processing, manufacturing, food processing, pulp and paper, and maritime industries for nearly a century. TODD industrial and utility boiler burners offer exceptional advantages that translate into long-term value. Todd offers the patented Variflame™ Burner (High Efficiency - low Emissions), Rapid Mix Burner(TM) (Ultra low-emissions), Variflame II™ (Low NOx w/ zero FGR), and the LCF (Maximum NOx reduction).

Limpsfield Combustion Engineering is an industrial burner manufacturer also offering complete boiler house solutions. Experienced in all common aspects and many more specialized areas of its field, Limpsfield offers experience, quality and competitive prices.

Autoflame is recognized as the world leader in combustion management solutions. First in the world to develop an electronic fuel/air ratio control for burners and have maintained their market leadership through constant development and innovation. The equipment can be fitted to burners of any design and has the flexibility to provide a solution to virtually any combustion problem. This control system has shown the capability of reducing fuel consumption in excess of 10%.

MAXON'S full line of industrial burners and combustion equipment includes gas burners, oil burners, gas valves, shut off valves, flow control valves, and low NOx burners. All of their combustion systems and equipment are designed and engineered with their customer's needs in mind. As the first industrial burner manufacturer to receive ISO 9001 certification, MAXON produces nothing but high quality products, which are held to the highest standards in the industry.

Accessories

Penn is a leading supplier of Boiler Blowdown Separators and Flash Separators. Other items include Blowoff Tanks, Exhaust Heads and Silencers, Entrainment Separators, and Continuous Blowdown Heat Recovery Systems

Topog-e makes gaskets to fit every steam boiler in production today and their gaskets are internationally recognized and renowned for their high quality, exceptional performance, and ease of application.

HeatSponge Boiler Economizer
Sizes for every application and budget
Carbon and Stainless Steel Construction
Low maintenance and easy to use
Condensing Units available

BFS Industries, founded in 1946, continues the honest business values that have become synonymous with our name. Whether your project calls for a simple, economical system or a complex, highly engineered system, BFS provides the consistent high level of quality that our customers have come to expect.

BFS manufactures a complete line of boiler room and diesel generator support products, including deaerators in spray, tray, and packed column type; boiler feed and condensate systems; and oil pumping systems and day tanks.
