

App Virtualization 2.0

A Migration Path for XenApp 6.5 Customers

### We built VDI 1.0/App Virtualization 1.0

Amitabh Sinha
CEO

GM XenApp, XenDesktop, Citrix

Puneet Chawla CTO

Founding Engineer VDI, VMware

Brad Peterson
VP Marketing
Sr. Director Marketing,
Citrix

Jimmy Chang VP Products & Alliances

**Director Products, Citrix** 

Prasad
Krothapalli
VP Engineering

Sr. Director Engineering, Citrix

### Access is getting much more complex

**Locations** Devices

Home PC Work Mac Public iOS

> Android BYOx

Thin Clients

**End User Driven** 

**VPN** 

Cisco ASA Pulse Secure Fortinet

F5

Palo Alto Networks Netscaler

SSO

NTLM/Kerberos CA Siteminder Oracle iDP Okta **Applications** 

Windows Client Server

Custom Web Packaged Web

SaaS

HTML5

VDI

**Native** 

**CIFS** 

OneDrive

SharePoint

**LOB Driven** 

**Datacenters** 

Multiple Private Multiple Public Remote Office Branch Office

IT Driven

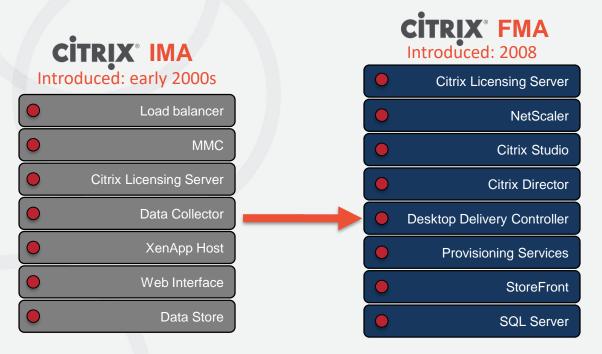

### XenApp 6.5 is legacy app delivery

- Only solves legacy windows client-server apps problem
  - App compatibility issues
  - Loses responsive behavior of modern applications
- Built on legacy IMA Architecture
  - Requires expensive, rip-and-replace upgrade to 7.x FMA
  - EOL for 6.x and 2008 R2
- Product Gaps in XenApp 7.x
  - Does not handle multiple sites or zones well
- High Total Cost Ownership
  - Needs expensive Netscaler CAPEX and OPEX for best experience
  - Is RDS good enough? You are already paying for it!

### XenApp 6.5 is EOL; Migration is challenging

- Migration is slow and expensive
- Requires training and consultants
- Typically, takes 6+ months to migrate
- Result: upgrading from a 2000 to 2008 architecture.

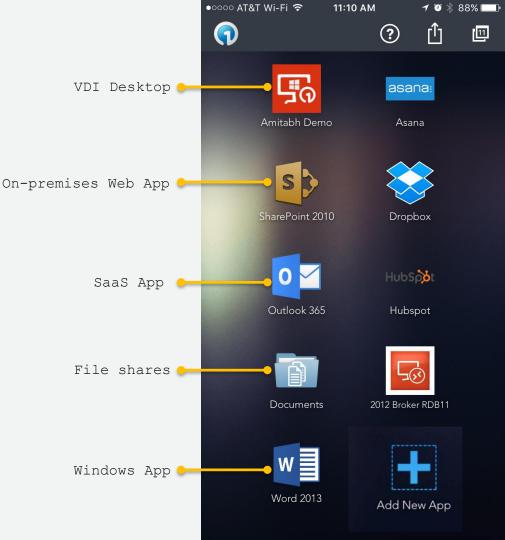

### **Our Mission**

Create the **simplest cloud service**to deliver a **unified workspace**to a **million users** 

### **Unified Workspace**

- Aggregates access to different types of virtual desktops, apps, and data
- Cross-platform (iOS, Android, Windows, Mac)
- Location-aware (Cisco, F5, Pulse Secure, Fortinet)
- SSO-aware (Okta, NTLM/Kerberos, CA Siteminder, Oracle iDP, etc.)

### **Deploy Workspace in 60 Minutes**

Configure from the cloud

Deploy 50x faster

Save 95% on CAPEX

Save 50-90% on OPEX

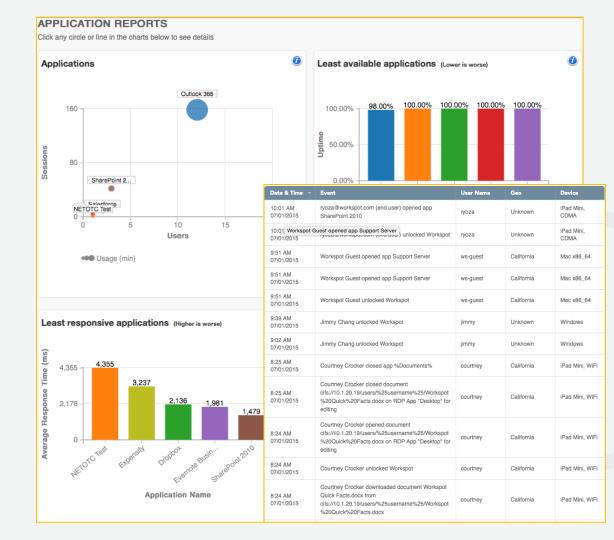

# Cloud-enabled Deep Analytics

Twitter-feed of end user activity for better security

Fine-grained usage, performance, and availability analytics to monitor end user experience

#### **CITRIX**°

- Load balancer
  MMC
  Citrix Licensing Server
  Data Collector
  XenApp Host
  Web Interface
  Data Store
- Citrix Licensing Server
   NetScaler
   Citrix Studio
   Citrix Director
   Delivery Controller
   Provisioning Services
   StoreFront
   SQL Server

Windows Server

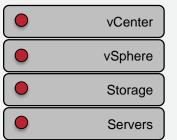

vCenter
vSphere
Storage
Servers

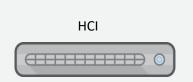

# The Evolution of End User Computing

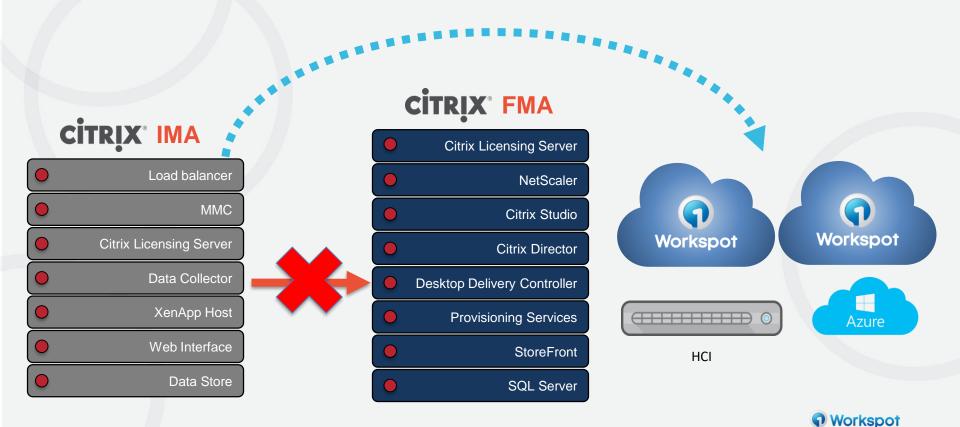

Google Cloud Platform

# Jump to an insanely simple cloud service for app and desktop virtualization Run apps on-premises or in the cloud

## Summary

Capability	Product Feature	Workspot	XenDesktop	XenApp
Deliver VDI to Any Device		<b>✓</b>	✓	
Deliver Web Apps to Any Device	Secure Browser	✓		
Deliver Windows Client Server Apps to Any Device	Embedded RDP Client	<b>√</b>		✓
Offline Document Access	Embedded CIFS Client	✓		
Consistent Experience Across Devices (including BYOx)	Cross-Platform Architecture	<b>√</b>	✓	<b>√</b>
Consistent Experience Across Locations	Embedded VPN Client	✓		
Faster & More Reliable Access	Embedded Client-side SSO Next-generation Control Plane Architecture	✓		
Visibility into Performance, Availability, and Usage	Big Data Analytics Engine	✓		
Granular visibility into end user activity	Big Data Analytics Engine	✓
