

Peer Review

Fast, proficient enrollment of your providers

Standardizing the peer review process is difficult and complex, involving many moving pieces - documenting policies, ensuring compliance, and recording the details of each case.

Our peer review software converts your mapped paper policies to an automated workflow, enabling you to easily maintain a consistent standard for peer review across all departments and providers, and ensures that everyone adheres to defined policies and procedures.

Convert hard-to-manage paper policies into an easy-to-manage automated workflow.

Facilitates quick process implementation, and provides transparency and accountability to your peer review process. Peer review events will no longer end up in a “black hole” or lost on someone’s desk; you will have complete visibility into the current status and to-do list for each event. We’ll guide you step-by-step from identification of an issue, through development of an individual performance improvement plan, to addressing quality concerns.

Dynamic Insights

One click gives you a view of all peer review activity for a specific provider, all reviews for a specific quality indicator, and all reviews for a particular department.

Demonstrate Compliance

Quickly satisfy auditing requests to The Joint Commission’s medical staff standards, such as OPPE and FPPE, as well as standards for DNV, HFAP, and CIHQ.

Record Timelines

Develop a comprehensive timeline to describe events, attach documents, and examine patient and staff data.

Transparent Analytics

Our robust reporting tools provide current and accurate case status updates to your key stakeholders, MEC, and board members.
