

SERVICE PACKAGES

Farm Camp

Training with Freight Farms is encouraged for all new freight farmers. With a combination of in-farm lessons and classroom sessions, each new customer leaves feeling confident about getting started. This training includes:

Classroom Sessions

- An overview of Leafy Green Machine operations
- Crop selection, scheduling, and climate optimization
- Food safety tutorials, resources, and best practices
- Software and operating system tutorial
- Business strategy and marketing sessions
- Next steps and planning for success

In-farm Lessons

- Farm system and daily operations overview
- Component identification and terminology
- Software and operating system session
- LGM operations: seeding, transplanting, harvesting, packaging
- Farmhand demonstration
- Sensor calibration tutorial
- Maintenance schedule and troubleshooting tutorial

LGM Launch Support

Get your farm up and running with the help of our Farmer Success Team!

- Power up the LGM
- Level and unpack the farm
- Fill up water tanks and test the irrigation system
- Program Agrowtek controls and calibrate sensors
- Camera setup and installation
- Connect the LGM to farmhand®
- Seed your first crop!
