Terms and Conditions

Orders placed with the factory are due and payable net 30 days. The F.O.B. point is our factory in Haverhill, MA. The minimum order amount is $25.00, and all cancelled standard orders are subject to a cancellation charge of up to 25% of the original order. In addition, all orders, standard or special, entered upon our books cannot be countermanded except with our consent, and then only upon terms that will indemnify us against loss.

Shipment

All orders ship Knocked Down (**KD**). For Factory assembled or installed orders please call 1-800-739-9067

Damage in Transit

For your protection, examine each shipment carefully for external damage. If there is any evidence of damage or shortage in transit, insist that the delivery carrier make appropriate notation on the freight bill of lading before you sign anything. If, after receipt, any internal or hidden damage is discovered, immediately notify the carrier and request an inspection report to support your claim. Claims for damage or shortages in transit must be filed with the delivery carrier. Pro-Line will not accept any return of merchandise that has been damaged in transit. Your recourse is with the delivery carrier.

Returned Merchandise

No goods are to be returned to Pro-Line without a written R.G.A. (returned goods authorization). A handling fee of 25% or $25.00, whichever is greater, will be charged on all returned merchandise.

Specifications

Pro-Line reserves the right to make changes at any time, without notice, in colors, prices, materials, equipment, specifications or models. Although every effort has been made to ensure the accuracy of all information contained in this catalog, Pro-Line cannot be held responsible for any omissions or typographical errors. Please check with your local Pro-Line representative or distributor, or contact the factory direct, for the latest and most complete information before ordering.

Pro-Line products are warranted to the original user to be free from defects in design, material and workmanship, given normal use and care, for a period of eleven (11) years of a single shift service, from the date of purchase.

With the exceptions noted below, Pro-Line, at its option, will repair or replace any products or part thereof which fails as a result of such a defect during the following warranty periods (prorated for multi shift operation).

All Pro-Line products (except as noted)	Eleven years
Operating components, functional mechanisms, high-wear parts such as casters	Five years
Wood or wood/metal framed products	Two years
Textiles, covering materials, foam, finishes, exposed wood, fabrics, laminated electrical components, and electric or hydraulic height adjustable bench components	One year

This warranty is limited to the replacement and/or repair only, of such defective part(s) authorized in writing to be returned to Pro-Line with transportation fees and costs prepaid by the purchaser, and provided that examination by Pro-Line discloses such defect(s). In no way shall Pro-Line be responsible for any damage by the carrier, abuse, negligence, misuse, user modifications, or customers material(s). Pro-Line does not warrant the matching of color, grain, or texture.

Accessories, components, parts, and laminates not manufactured by Pro-Line are warranted to the extent of the original manufacturer's warranty.

Pro-Line will not accept unauthorized fees or charges for expenses (i.e., labor and freight) incurred by the customer. Products which have been repaired or altered by anyone other than Pro-Line or without Pro-Line's written permission or, in our judgement, has been subject to misuse, neglect, accident, or use outside specifications by purchaser or others are excluded from this warranty.

This warranty is in lieu of any other expressed or implied warranty, including any implied of merchantability or fitness for a particular purpose, and of any other obligations or liability on the part of Pro-Line.

INTRODUCTION

A FOCUS ON ERGONOMICS

Next to the common cold, no problem accounts for more lost work days (or as many doctor visits) as the aching back. The majority of workplace back injuries result from small, repeated doses of damage rather than from a single specific incident. According to OSHA, each year back injuries account for 28.6 lost workdays per 100 workers. Bureau of Labor Statistics data show that lost workdays from all injuries has increased from 62.1 days per 100 workers in 1978 to 74.2 workdays in 1989. The Department of Health and Human Services had hoped to reduce lost workdays to 35 per 100 by 1990, a goal that has become utterly hopeless in the face of rising rates of muscular-skeletal injuries. Cumulative trauma disorders (CTD's) are the most rapidly growing category of injuries and illnesses reported to OSHA. In 1980 only 18% of work-related illness could be laid at the doorstep of "ergonomic disorders"; by 1990, that figure had risen to 55%. Other studies have indicated the lost days were even higher than claimed by the Bureau of Labor Statistics.

Lost work days and hours are only part of the problem. Workers trying to make their body fit the task rather than the task fit the body are losing productivity due to fatigue every hour they are "on" the job. Measuring hours lost on the job is far more difficult.

The first line of defense against any CTD is to try to prevent the injury before it starts. In the case of back injuries, which are the most disabling and costly ones, not only to industry but to the employees affected, primary prevention is complicated by our poor understanding of the etiology or chain of causation of back injury.

Most injuries related to poor ergonomic design of equipment being used, do not begin with a major trauma; most are the product of months or years of mini-trauma.

What can you do now to improve your productivity as well as protect your employees' health?

1. Evaluate your injuries. When and how are injuries occurring? Are your workers aging or out of shape? Are new employees predominately the ones getting hurt? Once the evaluation is done:
2. Redesign the job. Job redesign along with sound ergonomic principles is probably the single most important factor in increasing productivity and reducing worker injuries.

Whether you are revamping an assembly line, or replacing a single piece of equipment, the idea is the same: try to make the job fit the worker; don't try to force fit increasingly diverse workers to the job. This may take the form, in a large company, by providing mechanical lifting devices and using robotics to simple, inexpensive solutions such as ergonomic workstations. This is where Pro-Line hopes to fit into your plans. Since the 1978 debut of the first generation Model HD (still our most popular model) and our retractable ball transfer table, Pro-Line has been the leader in ergonomic workstation design. Since 1978, each year we have introduced new basic model workstations, ergonomic accessories and ergonomic handling devices. In this book you will find what we feel is the "leading edge in modular ergonomics."

Please keep in mind that the field of industrial ergonomic design is still emerging. The products found in these pages are those with broad applications. Many of our orders are designed for a customer's unique application. Start by calling or fax a freehand sketch to your distributor or the factory. We will return your idea as a drawing and with a quotation.

Hi-Tech environments require more than strength, modularity and ergonomic design in their workstations. They want esthetics. Manufacturing furniture can't be as plush as office furniture, but management still wants manufacturing and technical personnel to feel they are working in a professional environment. They are getting away from stringer supported grey legs with holes, tops edged with plastic (the most common fracture point), metal drawers with sharp edges (at knee level). When you consider it, is it fair that an average office employee sits in a $3,600 cubical and many manufacturing employees sit at $195 industrial grade benches?

In designing all our products, we have strived to incorporate strength, ergonomic design and esthetics,
all along keeping in mind that we want to offer the end result at an affordable price.
Pro-Line is committed to giving you the quality and service you deserve.

Give us a call next time you are putting up a new building, setting up a new line or simply modernizing your production or lab area and you will see you can get the latest designs in ergonomic workstations at a fair price.

Sincerely,

Robert W. Hatfield Jr.
President

HOW TO CONFIGURE A MODULAR WORKSTATION

First select a base model

Example **HD603030PL-H11**

Model	Length	Width	Height	Worksurface	Color

All ESD Stations require ground kits for proper operation. See page 42 for options.

MODEL HD

Standard Height 30"H.

Tops also available in Stainless, Polypropylene, Epoxy Resin, Etc.

"The most workstation for your money."

The esthetics of the Model HD combined with the heavy duty, independent 4 leg design and the almost infinite selection of modular accessories have made this model the workstation of choice for production/lab areas at most every Fortune 500 company in America. With an unbeatable price vs. quality, you cannot go wrong with our most popular model. 2" Square tube legs with high quality paint finish. 5,000 lbs. capacity.

T mold protection around the perimeter of laminate tops. (Matching T mold, laminate face modular drawers to protect operators legs and clothing.)

Optional casters are available to mobilize all basic workstations.

Additional charges apply per station for other heights. All ESD stations require ground kits unless otherwise noted.

Make any unit mobile.. Optional Casters on page 40

750 lb capacity vertical adjust station for applications that our standard 330 lb capacity Ergo Line does not address (Height range 11.812"). **Standard height adjustment 30.375" to 42.187".** Other heights available - Additional charges apply

For Electric Hydraulic Push Button Height Adjustment add **Prefix ELHE** to the Part number.
Additional charges apply, please consult factory

Simply the best ergonomic station ever made.

This is the station for the next millennium.

- **UL and CSA approved motor and control box.**
- **1000 lbs. capacity.**
- **Three-position programmable height memory switch.**
- **Ships "KD" or assembled.**
- **16" of travel.**
- **Unit adjusts from 30.5" to 46.5" only. For other heights see ELHE.**

The MVSII is an electric height adjustable workstation. The unit adjusts from 30.5" to 46.5" with 1000 lbs. capacity at a travel rate of .5" per second. Sturdy but simple design allows unit to ship "KD" or assembled. Unit assembles in the field in minutes. Programmable switch allows operator to program up to three heights into memory or use the up/down switch for full 16" of travel. Our modular drawer system and other under the surface options can be added in the field.

The MVSII is "In Stock" in both 60" L x 30"W and 72" L x 30" W in light blue.

18" Wide Shelves have a 4" overhang front and rear.

Riser Shelf Surfaces Standard or ESD laminate with "T" mold

Pro-Line's Riser shelves turn any of our stations into a Technical Work Station. Heavy gauge painted steel frame easily mounts to all of our models. The -3 includes 6 built-in 15 amp 120-volt electrical outlets across rear support.

S-2P Electrical Panel

The S-2EP electrical panel allows you to add additional outlets to either -1 or -2 riser shelves. Price includes panel with 6 outlets on/off switch, built-in circuit breaker and power cord.

LAN STATION

These units are priced complete with a 24" x 36" worksurface, two AMS1836, MA-1, CPU holder, power supply and wire management trough. Standard unit is 36" wide x 69" high and 36" wide x 83" high. Easily bolts together to make unit as long as you need.

PART NO.	DESCRIPTION	Wgt. (lbs)
LAN3666	36" Wide x 69" High open frame	145
LAN3680	36" Wide x 83" High open frame	165

For additional LAN Stations see page 24.

CPU HOLDER

CPU Holder mounts under work surface for convenient storage of CPU. Painted steel to match workstation.

PART NO.	DESCRIPTION	Wgt. (lbs)
CPU	8"W x 18"D x 18"H I.D.	15

Requires CPUHK hanging kit.

BACK LIGHT STATIONS

Light fixture beneath surface illuminates translucent plastic top. For film inspection, these units are used mainly in optical and medical applications. Built on our model CHD design 120 volt 15 amp.

PART NO.	DESCRIPTION	Wgt. (lbs)
BL483030	Back Light Station 60"L x 30"W	235
BL483630	Back Light Station 60"L x 36"W	240

Standard Height 30"

Other heights available- Additional charges apply

Height Adjustable with Tilt Available

Shown with optional tilt. Add ET-1 See page 36.
Shown with optional MVSII base

PLEASE CONSULT THE FACTORY FOR ALL YOUR CUSTOM FABRICATION REQUIREMENTS.

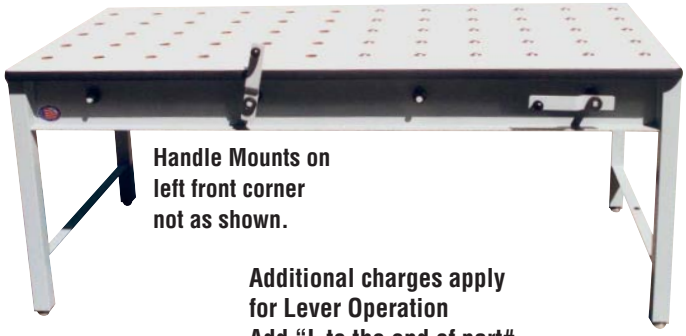
"EASY GLIDER" • "POP UP BALL TRANSFERS"

"Pop Up" Ball transfers assist in transfer and positioning of materials in production. Ball transfers raise .250" above surface by activating pneumatic toggle switch. Work in process is then slid on to station. When load is in position, ball transfers are retracted and load is stabilized. Standard stations require 80 PSI of shop air to operate. Retractable ball transfer stations are available in half or full length coverage of surface. Two ball patterns are available: standard 6" x 6" pattern and heavy duty 3" x 6". Modular design allows for mounting of optional accessories. Stations feature a solid maple surface or an E.S.D., Electro Static Discharge Top. Heavy Duty 2" square tubular legs offer stability and esthetics. Leg extenders allow surface height to be set from 30" to 36". Footrest included.

Optional foot pedal control available at an additional charge

Not Shown

Lever Operated Transfer Stations require no shop air.



Handle Mounts on left front corner not as shown.

Additional charges apply for Lever Operation Add "L to the end of part#

Photo shown with optional accessories.

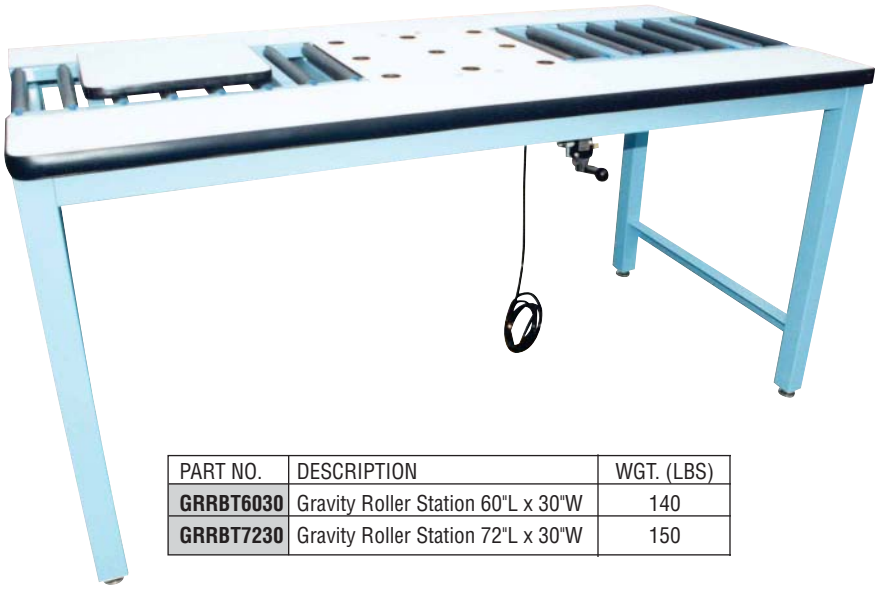
ELE	Upcharge to add 4 post Push button electric height adjustment	45

BUILT IN GRAVITY ROLLER CONVEYOR

Do you manufacture on a progressive assembly line?

These units allow product to roll from one station to the next with a 12" x 12" Retractable Ball Transfer section in the center of the surface. 1" dia. x 12"L Rollers are set on 3" centers on either side of ball transfers. Transfers, when up, are set at same height as roller which allows product to be rotated. 200 lbs. capacity. Priced with standard laminate work surface.

Please consult factory for other work surface choices



PART NO.	DESCRIPTION	WGT. (LBS)
GRRBT6030	Gravity Roller Station 60"L x 30"W	140
GRRBT7230	Gravity Roller Station 72"L x 30"W	150

FIXED BALL TRANSFER TABLES

Fixed Ball Transfer Tables with ball casters surface mounted or recessed to match level of RBT unit also available. **(Shown with optional casters, making the cart mobile.)** 1000 lbs. capacity.

Priced with standard laminate work surface. Please consult factory for other work surface choices

Optional handle available at an additional charge

For Optional Casters See Page 40

PRO-FLOW BELT CONVEYOR STATION

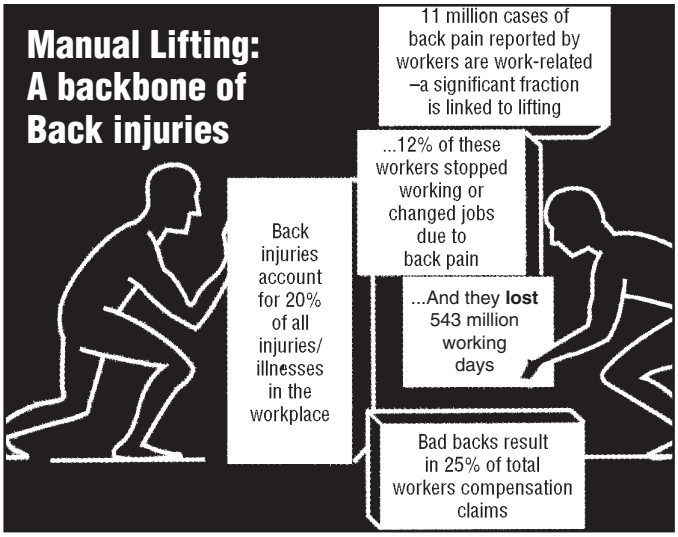
Variable speed belt conveyor built into our popular cantilever workstation. Works great with progressive assembly applications. UHMW work surface makes it easy to slide product on and off conveyor. Belts come in ESD polypropylene. Just pop in place side by side and plug in!

Standard Features include

- Modular Plug and Play Design (units are prewired to be put into a line and plug into each other)
- Variable speed control (from 2 to 25 FPM)
- Premium polymer flat chain belting (ideal for low pressure accumulation)
- Self tracking / no tensioning required
- Energy efficient 115V AC (0.5 AMP)
- No scheduled maintenance
- Available in four widths 9", 12", 15" or 18"
- Belt capacity 100 lbs

Standard bench size is 60"L x 30"D. For other sizes consult factory. Standard height 34". Other heights available at an additional charge
(Please specify at time of order.)

Please specify direction of belt.



**BELT CAN BE MOUNTED TO THE FRONT OF THE WORKSTATION AS WELL.
PLEASE SPECIFY WHEN ORDERING**

DIMENSION NEXT

MODULAR TECHNICAL SYSTEMS

'DIMENSION NEXT' EXPANDABLE MODULAR WORK STATIONS

Top quality finish meets modular ergonomic function with a price that is still affordable.

Solid slotted aluminum uprights allow work surface or optional accessories to be mounted anywhere along column. Heavy gauge steel frame bolts to top supports adding strength to the work surface and lateral support to the station. **In stock colors are textured beige powder coat finish with blue accents strips** Offers a durable finish with superior esthetics. Stations are 82.875" over all height. Work surfaces and optional accessories adjust independently of each other on double sided stations. 1000 lbs. capacity.

- Single sided starter station includes two uprights, two horizontal leg supports, one top frame assembly and one 180 degree front edge work surface with standard or ESD laminate.
- Single sided add-on station includes one upright, one horizontal leg support, one top frame assembly and one 180 degree front edge work surface with standard or ESD laminate.
- Double sided starter station includes two uprights, two back to back horizontal leg supports, two top frame assemblies and two 180 degree work surfaces with standard or ESD laminate.
- Double sided add-on station includes one upright, one back to back horizontal leg support, two top frame assemblies and two 180 degree front edge work surfaces with standard or ESD laminate.

(each row requires one starter unit)

CORNER SHELVES for the CCU30 and CCU36

Corner shelf units are available for both the CCU30 and CCU36. Shelves are 12" or 18" deep. Price includes mounting bracket and hardware.

CORNER UNITS

Need to set up your work stations in an "L" shape configuration?

Pro-Line's work stations are easily configured to meet your layout as illustrated in these photographs. With two corner units to choose from. The ACU aisle corner unit is designed to set corner units on an aisle. This triangular piece comes complete with mounting hardware and supports. The CCU corner unit is a free standing unit designed to set in corners. Just slide two stations up to it and you have an "L" shape.

Surfaces priced with "T" mold edges.
Additional charges apply for self edge.

NEW TO THE STOCK PROGRAM 'THE BASICS' 60" & 72" IN STOCK

The Basics is similar in design to our Flexline system. The accessory uprights are included in the base station and the work surface adjusts from 30" to 36" high on 1" increments. From floor to top of frame is 65" high. The Basics station and frame bolt together to keep freight cost down and to minimize storage space when not in use. The Basics is available as a single sided stand alone station or a double sided stand alone station. To help keep cost down, add on stations are available for both the single sided and double sided stations.

Single Sided stations come complete with frame, two top supports, two horizontal leg supports and one worksurface.

Double Sided stations come complete with frame, four top supports, four horizontal leg supports and two worksurfaces.

Add on stations share a top support and a horizontal leg.

SHOWN WITH BCCU30 CORNER UNITS

DOUBLE SIDED STARTER DOUBLE SIDED ADD-ON CONFIGURED IN A "QUAD"

WIRE HARNESS ASSEMBLY STATIONS

The MWH and the EWH models are designed for the ergonomic assembly of wire harnesses. Both models feature a 72" long x 36" wide platform capable of holding boards from 24" wide x 24" long up to 48" wide x 96" long. Both models incorporate an adjustable front guardrail that captivates boards from .250" to .750" thick. The EWH features a 60 degree electric foot pedal operated tilt with 600 pounds capacity. When the EWH is fully tilted, the front edge of board adjusts from 24.5" to 40.5" high via foot pedal operation. The MWH features a 13 position manual 60 degree tilt and 150 pound capacity. When the MWH is fully tilted, the front edge of the board adjusts from 24" to 36" via hand crank.

SECTION III

L.A.N. / COMPUTER STATIONS

Proline offers several models of LAN stations. These stations are designed to meet all your LAN needs. Incorporating our modular design these stations are flexible, ergonomic and affordable.

The LNFL model is built on our FlexLine series. It is available in 24", 30" and 48" lengths. These units are easily bolted together to allow you to configure the ideal LAN station for your application. The part number LNFL includes an open frame 80" high, a 30" deep work surface and two horizontal and vertical leg supports. You add the accessories to meet your requirements. Work surface adjusts from 30" to 36".

LNHD

LNHD

The LNHD is designed from our popular HD model. The model shown is 72"Lx30"Dx94"H to top of upright. Features on this model include a set of plate casters (two swivel with brake two rigid), full width lower shelf, three pull out keyboard trays, split upright system with four double uprights extending 60" above the surface and two cantilever shelves 18" deep x 72" long. With Pro-Line's modular design it's easy to configure the LAN station you need.

18" clearance from shelf to underside of keyboard tray.

Worksurface Height is 30"

COMPUTER TABLES

Pro-Line has taken our basic concept of a sturdy and economical design and incorporated it into these computer tables. The “CT” model is a cantilever design that is 48"L x 36"D x 30"H. Features include a steel modesty panel and a 90 degree rolled front edge. The “ECT” is an electric height adjustable computer station. With the smooth operating electric motor the unit quickly adjusts from 32" to 51.625" high. The “ECT” has a 250 pound capacity.

PART NO.	DESCRIPTION	WGT. (LBS)
PRO-18785	Pull Out CPU Holder	9

QS

Black finish with a 360° swivel.
Adjustable strap fits up to 65” perimeter.

Mounts under any Pro-Line station.
Please specify model to be mounted to when ordering

FLAT SCREEN MONITOR ARM

See page 38

KEYBOARD TRAYS

Neatly and ergonomically store your keyboard. Both models slide under the work surface. Both models feature an adjustable clamp to fit any size keyboard. The “KBT” includes a black ABS plastic arm rest. The “DKBT” features a soft polyethylene foam pad with black vinyl upholstery. The “DKBT” is also height adjustable. The “KBT” has an optional mouse pad. The mouse pad for the “DKBT” adjusts with the keyboard.

OPTIONAL ACCESSORIES		
PART NO.	DESCRIPTION	WGT. (LBS)
QS **KBT**	Sliding Keyboard Tray with arm rest	6
QS **MP**	Mouse pad for the KBT	3
DKBT/DMP	Sliding Keyboard Tray, Delux mouse pad, with arm rest and height adjust	16

These keyboards can be mounted to all our models.
CPU and Keyboards include hanging kit.
(please specify for which model)

NOTE: When ordering accessories only, please indicate the model they are mounting to.
Example: For a shelf with a Flexline Station use CSPL1260PL FL.

UPRIGHTS

Universal Uprights accept all accessories which would be suspended above work surface. Features infinite adjustability and self tightening hardware. Complete with mounting hardware. Priced per pair.

PART NO.	DESCRIPTION	Wgt. (lbs)
UR24	Uprights 24"/60.96cm (12" Above Surface)	8
UR36	Uprights 36"/91.44cm (24" Above Surface)	10

PLEASE CONSULT THE FACTORY FOR ALL YOUR CUSTOM FABRICATION REQUIREMENTS

PLEASE NOTE:

When ordering accessories, the model number that the accessorie is mounting to must be indicated.

Example: A shelf mounting to a **F**lex**L**ine station would use a part #CSPL1260PL**FL** for the 60" Flexline work station.

ADJUSTABLE METAL SHELF

Rigid steel shelf painted to match frame. Easily adjusts from flat to 30° incline position.

0° - 30° WORK SURFACE TILT MECHANISM

Add to base price of station.

Often a tilted work surface allows operators to reduce lower back and arm fatigue. A front lip on the work surface keeps work in process on the table.

Electric Tilt – activated by push button or pedal.

Hydraulic Tilt – activated by hand crank

Mechanical Tilt – activated by lifting surface manually (13 positions)

Tilt option must be purchased with initial bench order.

PART NO.	DESCRIPTION	Wgt. (lbs)	Wgt. (cap)
ET-1	Electric Tilt	42	400
HT-1	Hydraulic Tilt	49	300
MT-1	Mechanical Tilt	25	75

CORKBOARD TACK BOARD

Tack board corkboard front with white plastic laminate rear. T mold edges for clean finish look includes supports. Mounts to uprights.

PART NO.	DESCRIPTION	Wgt. (lbs)	Wgt. (cap)

LEAN MANUFACTURING
(Point of use storage) Flow Racking

Store components at the point of use and eliminate materials handling. Includes two adjustable tiers of 48" long rollers. Each tier includes (3)- 9" wide rollers with front lip, additional tiers are available.

Show with optional light and power supply, see page 17 for more optional accessories

Point of use storage flow racking with 60" x 30" surface that adjusts from 30" to 36" high. 65"H to 96.250 with adjustable cross members set all the way in.

Part Number	Plastic Laminate	ESD Laminate
POS6030	**POS6030PL**	**POS6030ESD**

Additional shelves for point of use storage flow racking include: Two lateral braces and three 9" wide rollers with front lip.

Part Number	Plastic Laminate	ESD Laminate
POSAS	**NA**	**NA**

Please consult the factory for additional roller racks and other available sizes

FLOW RACKING

Need to neatly organize and queue components?

Pull kits from your stock room and load the flow rack. Gravity flow will then feed your tote to station. Pro-Line's structural steel "U" channel frame allows you to set shelf at your required height. Use with a workstation or order optional laminate shelf and work off rack. 48"W x 36"D x 80"H.

Unit comes with two shelves, for additional shelves see chart below.

PART NO.	DESCRIPTION	WGT. (LBS)
FOR4836	Flow rack with two shelves 48"Wx36"Dx80"H	290
FORAS	Additional Shelf for rack 48"Wx36"D	105
FORCS1248	Cantilever Laminate Shelf For Flow Rack. 12"D x 48"W	25

KITTING CART

Attractive, professional cart brings kits from stockroom to assembly. Totes included.

Tote size 16½"L x 11"W x 3½"H.

Worksurface 24"W x 36"L x 38"H.

Shelf size 9"W x 36"L.

PART NO.	DESCRIPTION	Wgt. (lbs)
KC-1	Kitting Cart	135

TURN TABLES

Why run around your sub-assemblies? These turn tables allow you to stay seated while your product can be rotated 360° and lock into position at various intervals. 30" or 36" high. Please specify.

Call for low profile models.

PART NO.	DESCRIPTION	Wgt. (lbs)
TT36	36" Dia. Table	110
TT48	48" Dia. Table	135

O.A.H. 86.25”

WORKSTATION FEED CART

Allows kits to be loaded at the stock room and wheeled into assembly. Gravity flow then feeds workstation. Call for custom sizes. Standard unit comes with two (2) 48" x 36" adjustable steel shelves at a 25° angle. Ball transfer shelves available upon request.

PART NO.	DESCRIPTION	Wgt. (lbs)
FC-1	Feed Cart	92
S4836	Additional Shelf	35

THREE SHELF SERVICE TRUCK

48" High. Four swivel casters plus handle. Steel construction. Fixed height shelves.

PRO-LINE WORKSURFACES

Pro-Line has a variety of work surfaces to choose from. Pro-Line's standard work surface, and our most popular, is a plastic laminate surface with "T" mold edges. These surfaces are available in both standard and ESD laminate. With radius corners and "T" mold edges, it is durable, economical and worker friendly. For class 100 clean room and below we offer a self edge work surface. These surfaces are finished on all four sides with square edges that match the work surface. For added clean room protection we can laminate the bottom of our self edge work surfaces and our rolled front edge surfaces. Pro-Line also offers solid maple work surfaces. These work surfaces are 1.750" thick and both front and rear edges of the surface are eased for worker comfort. Our last standard work surface is a stainless steel 16 ga. 304 2B finish surface. They are 1.5" thick and both front and rear have an eased edge. Side edges are square. Should you need a work surface not listed here, feel free to give us a call. We also offer galvanized steel surfaces

Pro-Lab Series

Modular Laboratory Furniture

Available in Powder Coat Textured Finish Only

- Heavy Duty Modular Cabinets. 16 gauge steel
- 95% extension slides with 100 pounds capacity
- Recessed handles & Polished aluminum (recessed handle shown)
- Available in Powder Coat Textured Finish Only

Shown Two Tone Textured Blue & Textured Beige

- Pedestal drawers available with optional gang lock

Standard Textured Colors

505T2 | 530T2 | 607T3 | PLH606 | RFW627

Standard cabinets are 18"W x 27.5"H x 26" or 30"D Cabinet bases are available in three standard heights 3", 6", and 9". 1" adjustment with glide. Work surfaces vary from 1" to 1.75" thick.

Easily Configure your lab to meet your needs.

Mobile Cabinet bases are also available

Inside of drawers are designed to accept dividers every 1"

- Various Surfaces available
- Epoxy Resin
- Chem-Guard® " chemical resistant laminate"
- Colored laminates
- ESD laminate
- HDPE
- Stainless steel
- Multi-tiered adjustable shelving
- Double or Single Swing Door Sink Base Stainless Steel sinks
- Modular Cabinets easily reconfigure drawer combinations
- All housings accept both drawers and swing doors
- Swing door cabinets include one adjustable shelf
- Adjustable glides for level installation

Heavy Duty Modular Cabinets ***18" wide x (26" and 30" deep) x 27.5" high*** *(without optional base) Drawers feature 95% extension slides with 100 pounds capacity per drawer. Inside of drawers are slotted to accept optional dividers every 1" for optimal organization. Cabinet bases include leveling feet.*

LAMINAR FLOW STATION "CLASS 100"

Modular free-standing unit. Operates on 120V 15 AMP electric. Other sizes and work surfaces available. Please consult factory.

- 99.99% efficient HEPA filter at .3 microns or larger.
- 1" disposable fiberglass prefilter.
- Variable speed control. Air velocity from 50-120 FPM.
- UL Approved.
- O.A.H. 80"
- Standard height of surface 30" H
- Surface enclosed on three sides.
- Quiet <65 db. motor

Dimension Next

LABORATORY MODULAR TECHNICAL SYSTEMS

The Model DNL offers esthetics, flexible modularity and ergonomics. Designed with work surfaces and frames that give you the ultimate laboratory work station. Easily add and adjust optional accessories to meet your needs.

Work surfaces adjust vertically anywhere on the aluminum upright allowing increased operator comfort and production.

Pro-line's overhead cabinets and under-surface modular cabinets allow you to neatly organize and utilize work space.

Optional task lighting, shown mounted under sliding door cabinet, reduces worker fatigue yet takes up very little space

The **DNL** uses the same frame design as the standard **Dimension Next** allowing you to save money and space with double-sided units and add-on units.

- Single-sided starter station includes two uprights, two horizontal leg supports, one top frame assembly and one work surface.
- Single-sided add-on station includes one upright, one horizontal leg support, one top frame assembly and one surface.
- Double-sided starter station includes two uprights, two back-to-back horizontal leg supports, two top frame assemblies and two work surfaces.
- Double-sided add-on station includes one upright, one back-to-back horizontal leg support, two top frame assemblies and two work surfaces.

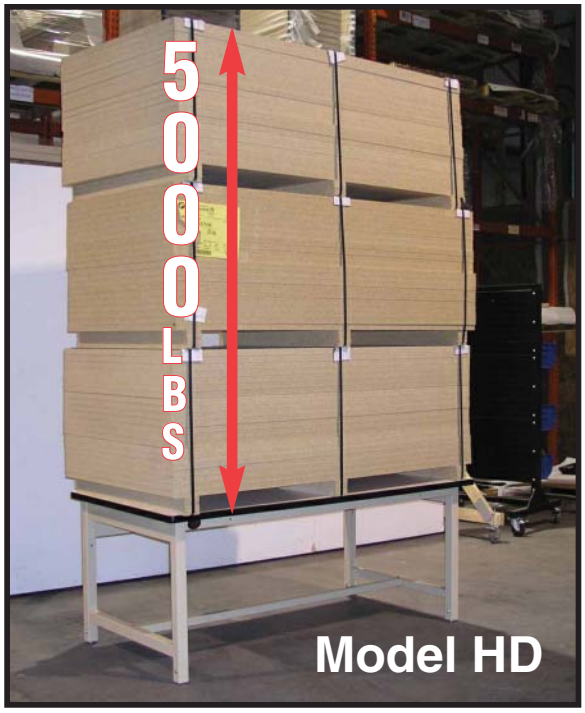
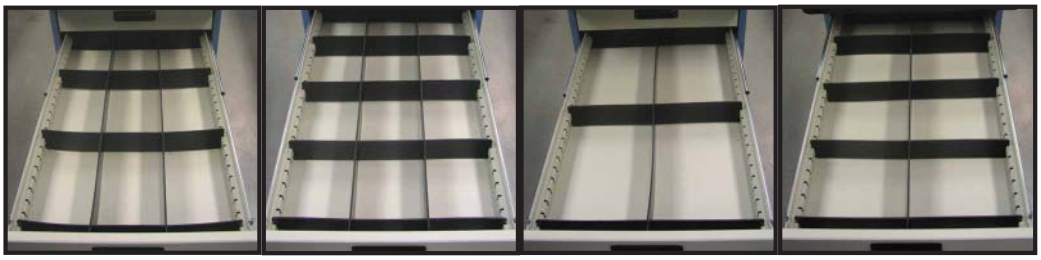
Sample Configurations



5,000 lbs capacity load test.

Mobile cabinet base



Optional ESD/UHMW Drawer dividers available in a variety of configurations Please call for details and reference part no.

How to design your own modular lab bench

A...Choose a base
Need options above the surface?
B...Select uprights
Going mobile?
C...Select casters
Need a footrest?
D...Select footrest
Require under surface storage?
E/F...Select drawers or cabinets
Need power?
G/H...Choose power supply
Need under shelf lighting?
I...Select a light
Need overhead storage?
J...Select a cabinet or shelving
Need wire managment?
K...Select a wire trough
