

WHICH SECURITY COMPANY IS BEST FOR YOUR BUSINESS?

If you're considering a professional security system for your business, you need to know which security company can provide the best solution for your needs. Most companies offer the same or similar technology. Are there any real differences? We think so. As a local California company exclusively serving California businesses, Bay Alarm's single focus is security. So what is the Bay Alarm difference? Actually, there are quite a few:

As a family-owned California business, Bay Alarm has unique, first-hand knowledge of the security needs of California business owners.

Bay Alarm is one of the first, and the largest provider of video-verification surveillance systems in the industry.

We have local service centers in neighborhoods all over the state, so wherever your business is, our technicians are always close by.

Our technicians are full-time, non-commissioned employees of Bay Alarm, so they're driven by customer service—not profits.

Bay Alarm monitoring center leaders provide training to other companies within the industry.

Our central monitoring station is staffed by local Bay Alarm response experts. In emergencies, our operators answer the phone within 6 seconds or less.

Our operator activity is audited weekly, with ongoing feedback and all calls recorded.

Bay Alarm operators are 5 Diamond Certified through the Central Station Alarm Assoc. (CSAA), having passed a rigorous industry-standard test.

Each of our technicians averages 200 hours of training, making them the most highly trained and best-screened employees in the security industry.

Having started here over 70 years ago, Bay Alarm has deep expertise in California security codes and regulations, as well as longstanding relationships with local law enforcement personnel.

Call us for a free onsite security review at **800-610-1000** and we'll show you how Bay Alarm can make a difference in the security and protection of your business. Also visit us at bayalarm.com.
