

The Leading Mobile Solution
for Home Health and Services
Care Delivery Management

Optimize Your Care Quality, Client Outcomes, and Productivity with CellTrak's Proven Mobile Health Care Solution

Simplify the Complexities of Delivering Health Care and Services in Homes and Communities

At the end of the day, **it's all about the client.**

But in the middle of what you do in providing home care, there is a world of ways your agency is at risk of jeopardizing care quality, risking non-compliance, and not running as efficiently or effectively as you could.

That's where CellTrak comes in. By automating workflow and providing real-time information, CellTrak helps your agency:

- Electronically verify visits via GPS and telephony
- Improve care quality
- Reduce costs
- Increase labor productivity
- Ensure compliance
- Enhance communication
- Improve staff retention and job satisfaction
- Increase referrals by demonstrating care quality

Run a Stronger, More Agile Agency with CellTrak

CellTrak's complete, integrated mobile health care solution makes efficient care delivery and real-time work force management easy. Over 4,000 agency locations that together deliver one million visits per week rely on CellTrak's Mobile Health Care Solution to increase quality care, communicate more effectively, improve compliance, reduce costs and increase productivity. With it, you'll operate more efficiently and improve care and service delivery.

More Than Just a Mobile App, CellTrak Fully Automates Your Office-to-Field Workflow

CellTrak's Mobile Health Solution delivers a combination of the right technology and the right services to help you efficiently provide outstanding care. With CellTrak, your agency benefits from sophisticated automation made simple for easy adoption and ongoing use.

Our technology connects your people in the field and in the office to help you better serve your clients. CellTrak automates workflow enabling your agency to go paper-free, saving time for caregivers and office staff, reducing errors, and helping you realize valuable savings in hard costs and administrative time while increasing caregiver productivity and job satisfaction.

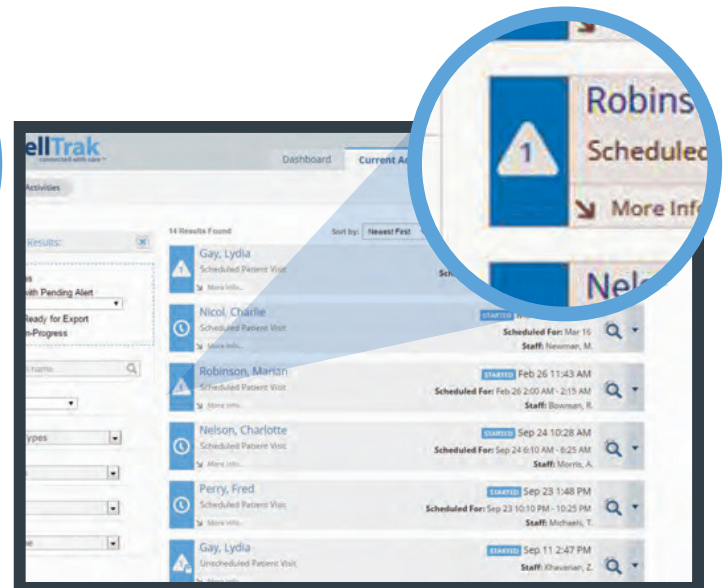

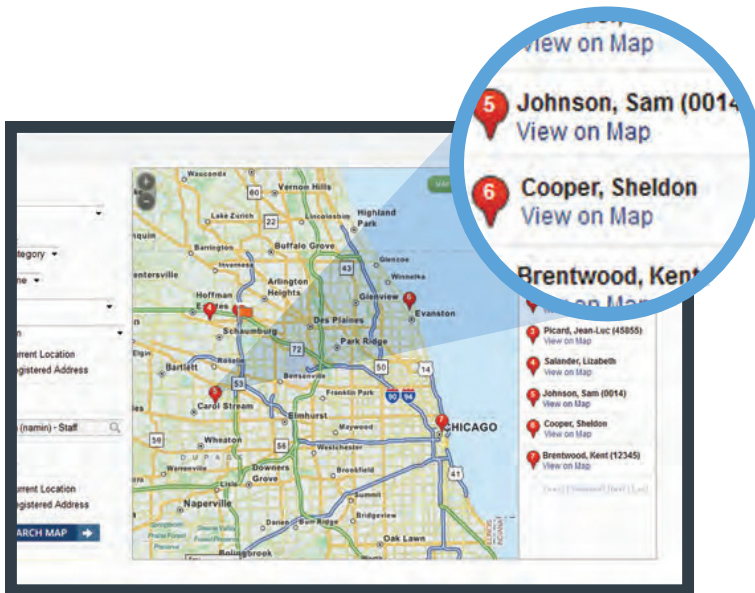

Provide Every Caregiver With the Right Mobile App

Meet your business needs and make care and service delivery easy with apps that work even when there is no WiFi or cellular service. Do GPS-based electronic visit verification. See up-to-the-moment schedules. Track time and mileage. Document at the point-of-care. Complete surveys, forms, and assessments. And much more.

CellTrak TimeManager® provides mobile visit verification and accurate time and mileage tracking. It can be used by any full-time, part-time or volunteer caregiver.

CellTrak VisitManager® adds the capabilities paraprofessionals need for efficient, effective delivery of personal services.

CellTrak Care Manager® goes even further, enabling professionals to manage conditions and improve outcomes.

Real-time Visibility Means More Efficient Operations

Run a stronger, more agile agency. Manage care delivery with real-time alerts and GPS-based visibility. Message securely and improve communication. View dashboards with performance information from the organization level by caregiver. Easily run reports and use data to optimize care delivery, prove compliance, reduce mileage costs and much more.

Cumulative Performance Snapshots

Improving outcomes requires coordination care across the care and services team. Provide secure access to people in your organization and to others, including families, to the information by client. See everything from real-time alerts about late visit starts and changes in condition to a full record of the assessments, care and services delivered, vitals and more.

Deliver Exceptional Care and Operate More Efficiently with **CellTrak's Mobile Health Solution**

"We have experienced a significant decrease in turnover of staff using CellTrak. It has enhanced their sense of inclusion and professionalism."

— Cathy Sorenson, CEO, Home Healthcare Hospice & Community Services

"The magic of a system like this is seeing how at every level of the organization nurses are using the health outcomes data to shape care at the client, organizational and system level. Nurses can see, in real-time, health outcomes data to make informed clinical decisions for care planning and care delivery and can reflect on data to inform nursing practice change."

CellTrak Helps Agencies Like Yours Achieve Valuable Savings and Realize Significant Benefits

"By giving our caregivers excellent tools to assist them in patient care, it allows them to offer better and more compassionate care to every patient. We are embracing technology to its fullest by adding more tools to better assist them in patient care."

CEO
Ambercare

"The hospice's nursing team is now able to visit 90 additional patients each week...Since our high-tech makeover, our patients and their families report being more satisfied with the level of care they receive. Verizon helped craft a way for our company to become better at what we do, and we're grateful for that."

Finance Director
Catawba Regional Hospice
