4 p.m., 7th Floor Auditorium

Gerald Vardzel Jr. (A Homecoming For This Proud Pitt Graduate!)

Global Specimen Solutions Inc.

"Today's Commercialization Partners are Driving Tomorrow's Innovations"

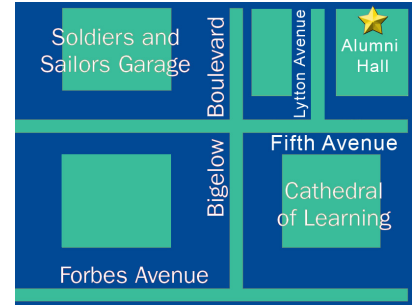

Opening Reception and Technology Showcase

5–7 p.m., J.W. Connolly Ballroom, 1st Floor

Please join us at this eagerly anticipated Opening Reception for Science 2015, featuring the highly popular Technology Showcase of new innovations recently developed at Pitt. Some of these health care technologies are available for licensing, and others form the basis of local, early-stage Pitt spin-off companies. At this first look, you will have the unique opportunity to network with these inventors and founders, as well as with local entrepreneurs, investors, and community leaders.

Take part in this opportunity to view novel Pitt discoveries that have already received development funding and mentorship from a host of sources on campus. To start off the evening, don't miss the Michael G. Wells keynote lecture and entrepreneurship competition winner announcement.

The Opening Reception, Technology Showcase, Wells Lecture, and Wells Competition are organized and sponsored by the Innovation Institute.

All Science 2015 events are free and open to the public.
