NFPA 70E Electrical Safe Work Practices

The course provides a thorough knowledge of the dangers and recommended safe behaviors for those who work daily around electrical hazards. The presenter will give examples of real life application to give attendees a better understanding of regulations regarding electrical and arc flash safety and how to apply them in the field. The details of this information is critical to any qualified electrical worker who is exposed to electrical hazards.

Instructor:

Steven J. Abbot, President of Stark Safety Consultants, Canton OH

OSHA Outreach Instructor, NJATC NFPA 70E Certified Training Specialist and Safety Planning Specialist for National Association of Safety Professionals
