

ABB

Push-Button Box - Smile 41

Gathers up to four push-buttons and an emergency stop button in a single compact device

Reduced stock levels and development time

Smile 41 exists in two different models and is highly adaptable. A kit of colored filters is supplied and the color of each button can be chosen after delivery and changed later. Pluto automatically manages the lighting of all the buttons.

High level of safety with a simplified cabling

Though only one cable is used for the signals of the four buttons, an eventual short-circuit can be detected by the Pluto and the highest level of safety can be reached.

Faster installation

Thanks to its small size and centred mounting holes, Smile 41 is easy to position. The four buttons are connected with only one M12 connector which speeds up the connection.

Less downtime

Smile 41 is intended to be used with Pluto, an easy to use Safety PLC offering extensive communication possibilities, thus enhancing user friendliness and simplifying troubleshooting.

Approvals:

Applications:

- Safe stop of a machine or a process
- Start, reset, stop buttons

Features:

- Compact size
- LED indication
- Fast M12 connection
- Only 5 I/Os necessary
