**XN300**—the slice card modular I/O system for the machine building industry

## Big efficiency in a small package

Eaton's ultra-compact, slice card-based XN300 modular I/O system features a high channel density plug-in connection system and can be combined with HMI PLC products in order to create the ideal system solution for your applications.

### Benefits:

- Compact
- Simple
- Efficient
- Convenient and Easy to Wire
- Neat and Easy to Keep Track Of
- Solution-Oriented and Multifunctional

**More information on back.**

## Plug into performance

**XN300—the slice card modular I/O system for the machine building industry.**

**Designed for your needs.**

The secret? Application-oriented functions that result in lower device costs and combine optimum performance with compact dimensions.

All this is combined with a sleek design and a convenient installation concept that makes handling easier and allows users to pre-assemble their I/O stations and the components they will be connecting.

Moreover, the plug-in terminal system and the way in which signals are clearly identified make commissioning easier and round off the system's characteristics, making it the perfect solution for the needs of machine building applications meant for mass production.
