

Hubbell Premise Wiring

iSTATION: USB 2.0 High Speed 110 Extenders

- Extend USB Signal 100 Feet Over UTP
- 110 Termination Reduces Installation Time
- USB 2.0 High Speed
- External Power Eliminates Power Related Issues

Hubbell's USB 110 Extender transmits 2.0 High Speed signals over one solid, unshielded, twisted-pair (UTP) cable, allowing data device to be located up to 100 feet away from a digital source. The USB extender is ideal for extending control to projectors, smart boards, flat screens and other data devices. It also supports high speed applications such as cameras, document transfers, and video conferencing.

The USB Video Extender is supplied as a kit with both modules (Computer and Device) and an external power supply that ensures peripherals will have sufficient power to operate. The modules feature an LED to indicate that power and signal are functioning properly.

Features

- Locate a display device up to 100 feet away with one UTP cable drop
- Terminate with Category 5e, 6 or 6A UTP plenum or non-plenum cable
- Supplied as a kit with "Computer" and "Device" modules
- Front or rear external power connection ensures ample power available for USB powered peripherals

Specifications

- Connector: 4-pin, Type A/B, female connector, gold plated 2µ"
- IDC Contact: phosphor bronze with tin plating over nickel under plating
- Material: high impact thermoplastic
