

iSTATION: HDMI High-Definition 110 UTP Video Extenders

HUBBELL Advantage

- Extend HDMI Signal Over UTP
- 110 Termination Reduces Installation Time
- HD High Definition Video 1080p
- Customize Point to Point Runs on Site

Hubbell's HDMI High-Definition 110 Video Extender transmit 1080p signals over two solid unshielded twisted-pair (UTP) cables, allowing video display devices to be located up to 147 feet away from a digital source. Ideal for projectors, smartboards, HDTVs, flat screens and monitors and other video display devices. The HDMI Video Extender is supplied as a kit with both Source (passive) and Display (active) adapter frame/modules that feature an LED to indicate that power and signal are working properly.

Features

- Locating a display device up to 147 feet away is as simple as pulling 2 additional UTP cables to a drop
- Terminate with Category 5e, 6 or 6A UTP plenum or non-plenum cable
- Supplied as a kit with a "Source" and "Display" frame/module and a 5-volt DC power supply

Specifications

- Connector: 19-pin, Type A, female connector, gold plated 2u"
- IDC Contact: phosphor bronze with tin plating over nickel under plating
- Material: high impact thermoplastic
