OAG® analytics

Traffic analyser

Understand passenger air traffic flows in any & every market

Understand where traffic originates, connects and ends

Benchmark and compare fares for different routes

Forecast traffic for new routes and the economic impacts

Analyse point of sale by country and region

About the reports

O&D Report
Bookings and average fares on a given origin-destination route with up to 2 connections.

Connections Report
Bookings and average fares by cabin for flights on a given O-D route through a specified connecting airport.

Power Table
Fully-customised reports of passenger booking and schedules data.
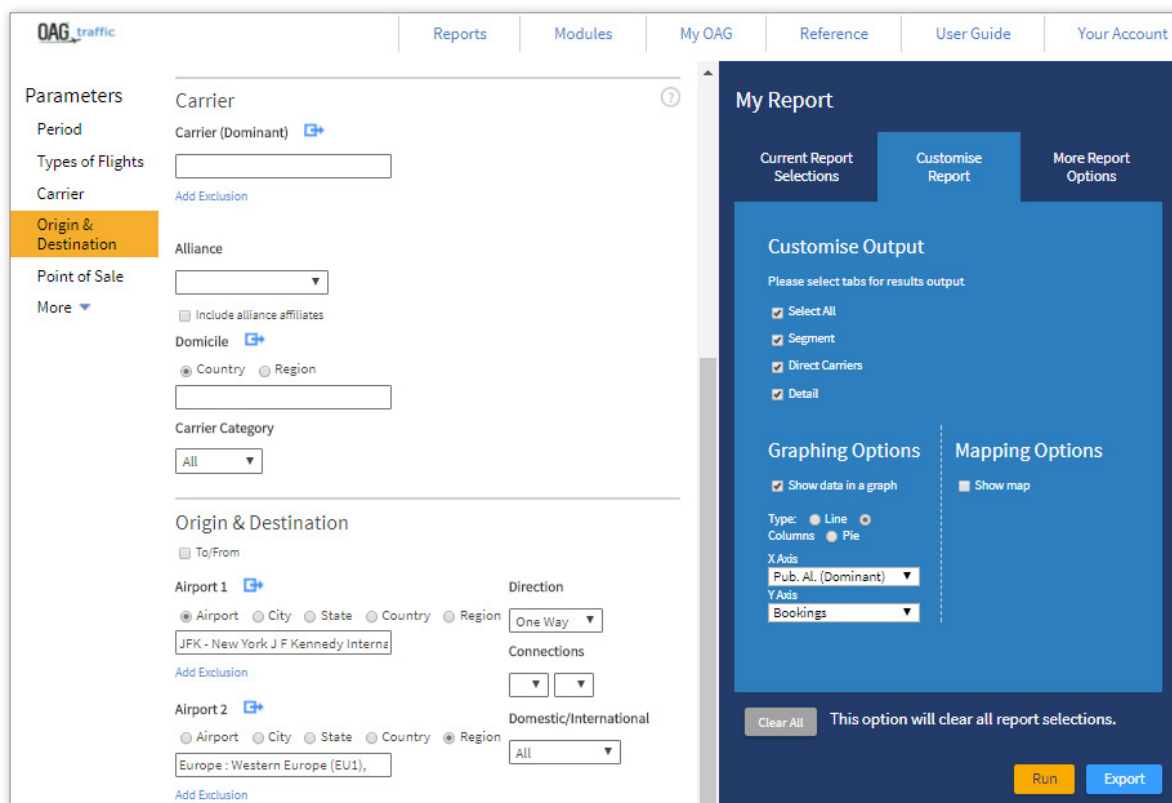

Top X Report
Top carriers, top departure/arrival airports, top routes, top hub airport and top point of sale based on various criteria (bookings, cabin types, total revenue, average fares).

Mix Report
Bookings and average fares for flights on a given non-stop origin-destination route, broken down by traffic type: local, behind, bridge and beyond.

Key Features
User-friendly interface, check criteria as you work, schedule to run automatically, configure columns and ready-made visuals. All reports to .csv,.pdf,.xls and .xlsx formats.

What data is included?

- MIDT (Marketing Information Data Tapes) **'passenger traffic'** based on GDS bookings
- Unadjusted bookings
- Adjusted bookings to **represent true total market figure**
- **Average fare data** from Travelport issued tickets
- **Historic traffic information** from 2010 & one year forward
