More Precise GMAT Score Ranges

Schools asked for more precise GMAT score ranges. Our new score ranges in increments of 20 points help schools with better segmentation and targeting of candidates.

Before	<p><i>N/A – Auto-populated from Pearson VUE</i></p>	 <p><i>Search in increments of 30 points (4 score possibilities) – For example, 690-720 gives scores of 690, 700, 710, and 720.</i></p>

See following slide for information on changes to recurring searches.

GMAT Score Ranges – Updates to Recurring Searches

- Our new score ranges will affect recurring searches. There are new “lower” and “upper” bounds for score ranges in the new system. The **ranges will be adjusted to the closest new bound on either end.**
- It is possible that this could have no effect on a recurring search, or decrease or increase the score “range” by 10-20 points overall.
- Schools can log into the GMASS tool at anytime to view and edit their score ranges, if desired.
