

# ARE YOU OUR NEXT NETWORK CONSULTANT?

## Working at IT Weapons

You should have proven problem solving skills and the ability to work both independently and with a team to meet aggressive project timelines. Successful applicants are able to work in a fast-paced, highly collaborative environment. We are looking for applicants who take pride in the quality of their work and who share our commitment to honesty, integrity, and personal accountability. You must have extremely strong verbal and written communication skills and the ability to interact professionally with a diverse group of technical personnel, executives, managers, and subject matter experts. A sense of urgency for task completion and for client experience are essential.

## Responsibilities

- Complete Networking Consulting projects (network design, network assessments and implementations) in a timely manner
- Implementation and support of VoIP systems (Cisco, ShoreTel, etc.)
- Unified communications and load-balancing using Cisco, ShoreTel and Citrix
- Perform regular analysis of network connectivity through the LAN/WAN infrastructure
- Configuration of SNMP monitoring, traps, and more to support and provide implementation
- Provide expert technical assistance to clients and our Service Desk
- Provide client user training and feedback
- Complete daily time entries and project updates in our Professional Services Automation system

## Education/Certifications

- University Degree and/or related Technical Diplomas are encouraged
- Cisco: CCNA is required, CCNP is strongly encouraged

## Preferred Experience

- 5+ Years working on Cisco networking hardware
- Experience supporting and implementing different types of wide area connections and VPN technologies (MPLS, L2, DMVPN, IPSec VPN, etc.)
- Level-2/level-3 network support for a number of enterprise networks totaling over 600 WAN/VPN connections and 8,000 users
- Demonstrate a thorough understanding of VLANs and dynamic routing protocols (OSPF, EIGRP, BGP, etc)
- Skilled with Microsoft Office and Visio applications
- Candidates must have a valid drivers license and 24/7 access to a vehicle.
