The most widely vetted, vertically integrated, comprehensive program in the industry.

This material is based upon work supported by the Federal Highway Administration under grant agreements DTFH61-06-G-00007 and DTFH61-II-H-00029 and grant number 46C3-HT06 from the Occupational Safety and Health Administration. Any opinions, findings, and conclusions or recommendations expressed in this publication are those of the Author(s) and do not necessarily reflect the views or policies of the U.S. Department of Labor or the Federal Highway Administration.

We are pleased to offer high quality safety education and training materials in cooperation with the U.S. Federal Highway Administration (FHWA). The program, Roadway Safety+, is an interactive instructional with 33 modules that can be customized to the needs of your audience (4 hours to 2 days)

ARTBA and its partners in Labor, Public Sector Employees, Higher Education and Trade Associations, are able provide on-site classes(including instructors and all training materials) at no cost to host organizations. The host organizations need to provide attendee recruitment and a location for the training. Host centers CANNOT charge for the course, but can charge for food if it is optional. These training courses CAN be held in conjunction with conferences and other training classes for which you charge a fee (i.e. as bonus sessions).

These classes are made available on a first-come, first-served basis. Program hosts can determine which modules they want presented, and the length of the course. Courses can be taught in English and/or Spanish.

Because the program is very flexible, we can adapt our training approach to meet your content and schedule needs. In general, the modules in the “basic” section would take about 20 minutes per-module to teach. The advanced courses vary from 30 minutes to two hours, so we will need follow-up discussions when scheduling those modules.

To request a course, please provide the following:

- The name of the modules you would like presented
- Exact proposed date(s) you would like to calendar
- If known, the city/location where the course will be held

This information is needed so we can contact trainers and determine their availability to conduct the course. Once we have confirmation from the instructor, we will give final confirmation for the class and you can begin marketing to your audience.

We request class sizes of 25 – 30 participants.

In addition to on-site training programs, the following materials are available:

- 33 Interactive Modules
- 5 Trainee Booklets
- 120-page Instructor Guide
- 29 Toolbox Pamphlets
- 54-screen 14 x 20 Flip Book
- 9 Guidance Documents

Multi-Lingual

- English
- Spanish
- Portuguese

Topics Include: Driving • Electrical Hazards • Emergencies • Excavations • Falls • Flagger Hazards • Health Hazards • Struck By • Noise • Operator Hazards • Working Outdoors • Night Work • Traffic Control Setup • Sprains/Strains • **Advanced:** Disaster Response • Payment for TTC • Typical Applications • Use of Law Enforcement • Access/Egress • Exposure Controls • Positive Guidance • Worker Safety Strategies • Speed Management • Public Information • Runovers/Backovers+ • Motorcycles/Bicycles • Night Work Risks/Hi-Viz Apparel/Equipment/Lighting/Flagging
