

Press Release

SNP Transformation Backbone[®]: fourth release now available

Release 11.4 of the software for SAP transformations offers expanded functionalities and a unit specialized on client splits – SNP presents the transformation software at SNP Transformation Summit, being held May 23 in Heidelberg, and at SAPPHERE[®] NOW and 2011 ASUG Annual Conference, being held May 15 to 18 in Orlando, FL.

Heidelberg, May 9, 2011 – SNP Transformation Backbone[®] (SNP T-Bone) 11.4 is the fourth release of the world's first transformation software supporting the automatized adaption of SAP system landscapes to business restructurings and technological changes. Apart from expanded implementation functionalities, an optimized usability and enhanced migration control, the software offers a new version of SNP T-Bone Analysis Cockpit, which makes possible improved evaluation and graphic illustrations of analytic results. The renewed master data analysis allows SAP systems to be analyzed and evaluated offline across system boundaries and without size restriction. In the course of the software optimization, SNP streamlined, tailored and improved the unit portfolio with regard to merge, split, upgrade and harmonization tasks. SNP also added SNP T-Bone Unit Client Split, which supports customers with carve-out scenarios. The unit is designed for carving-out master and transaction data from a source client and moving it to a target client of a different SAP system. SNP offers software packages containing licenses for SNP T-Bone Basis and one SNP T-Bone Unit, training lessons, workshops, reviews, support with the go-live and hotline support during the project to customers and partners at a fixed price.

At SNP Transformation Summit, being held May 23, 2011 in Heidelberg, SNP is going to present the new SNP T-Bone functionalities. The event addresses primarily SNP customers, partners, and interested parties. At SAPPHERE[®] NOW and 2011 ASUG Annual Conference, being held May 15 to 18, 2011 in Orlando, Florida, SNP presents its portfolio to an international SAP public.

“With SNP T-Bone 11.4, our customers and partners have a reliable tool at hand to face the challenges of global system restructurings”, says Dr. Andreas Schneider-Neureither, CEO of SNP AG. By now, customers and partners worldwide are employing SNP T-Bone for their transformation projects. Some of them – Siemens, Porsche, ThyssenKrupp IT Services and Russian Railways – are going to report on their experience with SNP software at the SNP Transformation Summit event.
