

International and Specialty Programs Manager

The Software Application to Facilitate and Simplify ESL and International Programs

Software for ESL Programs

ESL and other language training and foundational university programs play an important role in allowing institutions to cater to today's diverse student body, but schools are often forced to handle these programs in cumbersome ways.

The Destiny One International and Specialty Programs Manager is a student-centric SaaS application that facilitates and simplifies how your school manages these complex and unique programs. It allows institutions to engage more effectively with international and ESL students, coordinate recruiters and sponsors more efficiently, and streamline program management.

Simplify ESL and language programs

Designed for programs such as ESL and language training, foreign credentials and more, Destiny One International and Specialty Programs Manager helps users efficiently manage large cohorts of students simply and efficiently.

Manage programs and assign learners

Model programs and offerings with flexible curriculum definition for required and elective courses and gain economies of scale by batch enrolling learners based on demographic statistics and exam results.

Attract and enroll international learners

Allow learners to access all relevant information and enroll securely online. Flexibly manage the application process and ensure that you always collect the right information.

Coordinate recruiting agencies and sponsors

Build connections with agencies by offering them access to the Agency and Sponsor Portal and foster greater agency involvement in the recruiting process through agent-initiated applications and agent tracking of applicants and students.

International and Specialty Programs Manager

VERSION 2.0

Key Capabilities

Program Planning

- Model programs and offerings with flexible curriculum definition for required and elective courses
- Model specific course sections that a cohort may enroll in
- Define available subjects and progression levels

Recruitment

- Create program-specific landing pages
- Manage multiple recruiting agencies and sponsors
- Provide an Agency and Sponsor Portal to manage applicants
- Set up agency and sponsor contracts to track tuition and fee payors, discounts and commissions
- Send and approve agency and sponsor contracts electronically with automated workflow

Application

- Manage program applications, and allow students or agents and sponsors to initiate the application process
- Create conditional questions within program applications that appear based on prior responses
- Collect international student addresses more efficiently with enhanced field format options

Admissions and Billing

- Bill the student, agent, sponsor or third party with flexible program and add-on fee assessments
- Capture full-time, part-time, new and returning status and automatically enroll students in a related certificate

Placement and Registration

- Configure the amount of profile information displayed for each student with a flexible offering roster
- Record exam results and assign progression levels for programs with competency or placement exams
- Achieve batch section placement and enrollment with placement dashboards that provide demographic statistics
- Create cohorts to easily place and enroll students assigned to the same progression level
- Allow students to choose their electives and staff to approve their selections

Program Support and Reporting

- Generate student class schedule
- Record student attendance in individual sessions
- Monitor demographic and academic events for international students
- Automated batch integration with SEVIS for U.S. schools including download of I-20s
- Record student grades, program progression and completion information

Re-Enrollment

- Define a repeat policy for each program
- Capture each student's plan for the next term, record progression level and re-enroll in batch
