## Technical Data Sheet

NECAL 9502 PRESSURE SENSITIVE ADHESIVE

## DESCRIPTION

NECAL 9502 is an unsupported film of pressure sensitive adhesive displaying excellent bond and initial tack.

## FEATURES

NECAL 9502 is designed for polypropylene and polyethylene. NECAL 9502 adheres to many other substrates. Because of its thickness NECAL 9502 is recommended for use on rough surfaces.

## PHYSICAL PROPERTIES

Composition:
Release Liner:
Thickness:
Adhesion: (1)
Tensile: (2)
Shear Adhesion: (3)
Temperature Range:

Modified Acrylic (low surface energy)<br>Available with P, W, H, HD, J, VF, P1, HD-2 or W1 liners<br>4.0 mils (total)<br>120-150 oz. /in. (Aluminum/Polypropylene)<br>$340-360 \mathrm{oz}$. /in. (Aluminum/Stainless)<br>225 p.s.i.<br>7 days +<br>Application: $50^{\circ} \mathrm{F}$. Minimum<br>Service: $\quad-20^{\circ} \mathrm{F}$ to $270^{\circ} \mathrm{F}$

(1) PSTC-1
(2) Polyester to SS (1 sq.in.)
(3) $1000 \mathrm{grams} / \mathrm{sq} . \mathrm{in}$. (polyester to SS)

## BONDING INSTRUCTIONS

Remove the release liner and apply to a clean, dry substrate. Use firm pressure to obtain maximum contact. Increasing application force will optimize bond strength to surface.

## STORAGE DATA

The shelf life of this material is at least two years when stored in a cool, dry place.

## NOTICE

The information shown here represents typical values, which may vary with each application. The values are not intended to be a performance guarantee. Users should determine, prior to use, the suitability of this material for their application.

## TI

## Standard UL 969

This material complies with
Component-Marking and Labeling
System Materials (PGGU2).
