

Azure Test Labs

On-demand environments to match your test matrix

Microsoft Azure

More Time to Test

Eliminate time lost on building environments rather than on testing your application.

Match Production

Reduce risk and improve quality by testing your test matrix with production like environments.

Empowered

Eliminate dependency and "blocked" time waiting for environments to be provisioned.

Pay-Per-Use

Optimize labs infrastructure investments by paying only for what you need (use).

Leverage InCycle's proven services and Lab Accelerators to speed delivery and adoption

- Rapid availability of realistic test matrix environments
- Self or by request provisioning of environments/VMs from pre-configured libraries
- Application monitoring for quick and objective feedback
- Enablement of best practices for automated deployments and testing

Microsoft Azure

InCycle's Professional Services

InCycle Lab Accelerators

- Dynamic scaling with automatic provisioning for infrastructure on demand
- Support all technologies and operating systems with hybrid cloud/local network capabilities
- Centralized governance through management portal and monitoring
- Optimized for performance and price

InCycle's Azure QA Labs Packaged Solution

Azure QA Labs Proof of Concept (PoC) with Microsoft Azure - 10 Days

Over the course of 10 days, InCycle will design and implement an Azure Labs solution to create and manage environments on-demand. This PoC, using your specific context and artifacts, will demonstrate how your new environment and capabilities can enable you to save costs, increase efficiency, improve quality and reduce time to test. Led by our hands-on and Senior Azure Architects, InCycle will deliver the following bundled services:

Discovery & Solution Design

- Analyze environment, tools and processes
 - Test matrix
 - Test automation
 - Artifacts
 - Tier - App/Business/Data
- Define baseline images
- Refine proof of concept scope

Test Matrix Automated Pro- visioning PoC

- Automate provisioning using Azure Resource Mgmt (ARM) templates
 - Custom VM and environment configurations
- Customize VHDs and artifact repository

Training & Presentation

- Transfer knowledge
- Configure labs maintenance, optimizations and tracking
 - Azure portal for costs management
 - Schedule shutdown / power-on
- Elaborate recommendations
- Present PoC results

Take advantage of your Microsoft Azure Enterprise Agreement (EA) benefits:

- ⇒ Discounted rates (almost 40%) on VMs
- ⇒ Access to MSDN images in Azure Gallery
- ⇒ Discounts on cloud services & websites
- ⇒ Consolidated subscription management

Ready to start?

Contact us to schedule your Azure QA Labs project today!

Interested to learn more?

Schedule a call to discuss Azure QA Labs and how it can be customized to meet your specific requirements.

Want to see it in action?

Schedule a private webcast to see a live demo.

You might be eligible! Microsoft service credits and other customer programs

Azure customers may receive service credits or be eligible for other Microsoft programs. Qualification is context specific and offers may vary. Program acceptance and related funding can be used or applied to finance an InCycle engagement. Contact us to learn more about how we can help accelerate your project.
