Revive

PROFESSIONAL ICE ROLLER

Thank you for choosing the My Life My Shop Revive Professional Ice Roller, the easy way to refresh, tone and tighten your skin in minutes! Cold therapy has long been used by spas, estheticians and celebrity makeup artists to create an instantly tighter, firmer, more dewy complexion. The Revive Professional Ice Roller is a convenient, hand-held device that is simple to use and features a variety of benefits to enhance your beauty routine and your health. Please take a few minutes to read this booklet so you can fully enjoy your new Revive Professional Ice Roller.

How to Use

To sanitize the stainless steel roller, apply rubbing alcohol to a cotton ball and wipe the roller. Place the roller in the freezer for a minimum of 4 hours prior to first use. Make sure your face is clean and makeup-free before using. Glide the roller over your face using gentle pressure in downward and outward motions, as if you were pushing the fluids towards the bottom of your ears, between your ears and chin and towards the back of your jaw to aid in lymphatic drainage. Be sure to apply light pressure, especially under the delicate eye area. Use morning and evening daily to firm, lift and revitalize. Always sanitize the roller after using and store the roller in the freezer between uses. Do NOT heat the Revive Professional Ice Roller.

Additional Uses

For acne/breakouts - Roll directly over the area at the first sign of a breakout to help reduce the size and number of blemishes. Use before applying topical acne medication to reduce swelling and inflammation, which will improve the skin's ability to absorb the medication and increase the effectiveness.

For muscle soreness/pain – Roll directly over the area to soothe muscle soreness, tension or pain following exercise.

For pain control – Use before cosmetic procedures to numb the area and after to minimize discomfort, irritation, swelling and redness. Roll over the affected area for pain relief from minor injury, burns or insect bites.

For shaving/waxing – use before waxing to numb the area and after shaving or waxing to calm redness and soothe irritation.
