20+ meeting rooms

As the operating system for employee benefits, Maxwell Health is one of the fastest growing companies in the Northeast. With two floors and over 150 employees, the company is leading the charge to simplify benefits and improve employee health.

**“I wouldn’t say Robin just keeps up — it’s twenty steps ahead.”**

Before moving into their new office, Maxwell Health didn’t have a scheduling system. They moved from 20 employees in only one open area with four breakout rooms, to a space with more than 150 employees spread across 20 rooms on two floors.

“As you can imagine, it was chaotic,” said Julia Bourque, Maxwell Health’s Creative Director. “We couldn’t afford to waste time walking between floors to find a room or to search for co-workers who’ve left their desks. We needed something that would make our lives a bit easier and be able to make us more efficient as a company as we continue to grow.”

## The solution

As a company that values design, Maxwell Health sought a solution that would be easy to use and have a clean interface to maximize employee engagement.

“There's a lot less stepping on toes with Robin in place,” said Bourque. “With the room displays, we don't need to go back to our desks to check who has the room, or to book another room. With the search filters, scheduling is easy and effortless.”

And with a growing team, onboarding new employees with Robin became second-nature.

“Robin made the set up easy with the resources already available, and seamless with Google sign up. It was actually little to no effort at all--even for administrators!”

## Next up

Maxwell Health is seeing less rooms being overbooked, and more efficient meeting scheduling happening in the office, which is paramount as they continue to grow. Looking towards the future, they're excited for how integral Robin will be.

“Meetings are just one of the many parts of our day-to-day; we don't want to spend any extra time setting them up or deciphering what's available. We need a technology that is reliable, responsive, and keeps up with what we need. I wouldn't say Robin just keeps up--it's twenty steps ahead.”
