Web Developer

Reports to: Web Team Lead Developer

Prodo Digital require a talented, enthusiastic web developer to join an expanding team.

Role Purpose:

The successful candidate will be actively developing new projects, as well as maintaining and supporting existing projects.

Development will mainly be focused around the Umbraco CMS Platform, as well as other applications built within C# MVC asp.NET.

Person Profile:

Prodo is looking for a developer who is hungry to use the very latest in web technologies and be able to create unique websites, which are the pinnacle in their marketspace. Prodo require someone who is keen to innovate both the projects they are working on and their own skills as well as the ability to raise the bar within the team.

Day to day the successful candidate will be working within a 21 strong development team, with a very broad skillset. Prodo are looking for someone to have enthusiasm to learn from their colleagues but also to broaden their own skillset independently and integrate their skills back through the team, mentoring junior team members. As well as able to support senior developers, on demanding projects.

Technical Requirements:

- Coding HTML5 and CSS3 to W3C standards.
- Have a working understanding of Git.
- Experience using issue tracking software (Jira)

With regards to asp.NET Developer Prodo would be looking for experience in:

- Using Asp.Net MVC C#
- Building Umbraco 7 websites
- Building/Maintaining Legacy Umbraco (4,6)
- MsSQL
- Integrating with Web Services and APIs (SOAP, REST, WebAPI)

The developer must be capable of creating websites across the full stack and so, in terms of front end skills, Prodo are looking for someone has experience:

- Using SASS (scss)
- Using task runners such as Grunt/Gulp
- Effective at writing and debugging JavaScript and jQuery.
- Be proficient in slicing PSDs in Adobe Photoshop.

- Experience working with CSS frameworks (Zurb Foundation/Bootstrap)
- Writing HTML and CSS to W3C Standards

Desirable experience:

- Capturing technical requirements from non-technical clients.
- Advising and brainstorming ideas on UX and User Journey.
- 2-3 Years Digital Agency Experience.
- Working with Agile Teams
