Physical Movement & Cognitive Development Equipment

The Kidsfit Story

In 1999 Kidsfit was started in a small warehouse with the dream of one day impacting the lives of thousands of kids. Today we manufacture 7 different lines of children's exercise equipment and our products are sold all over the world!

At the heart of what we do is a spirit of innovation and play. In 2011 we developed Active Play Obstacle Courses that create in children an irresistible desire to get active!

Thanks to you, we are able to produce products that make a difference in the lives of children everywhere. At Kidsfit we have one goal- "Motivate Kids to Move!" It is our passion and our life work. We are genuinely excited to partner with you to bring active, healthy, well balanced exercise to youth everywhere!

Model 902 “Kidz Club” Double Play House Obstacle Course XL

Model 902 “Kidz Club” Double Play House Obstacle Course XL

This dual house package is maxed out with details and fun for kids of all ages. Both houses are built on a foundation with the company’s logo and your character counts words or other phrases. One Play House has an elevated climbing wall obstacle leading up to the entrance and the other house has a curvy slide. The houses are uniquely designed with fun angled windows and skylights in each roof. They are connected by a tunnel so kids can travel back and forth easily as they explore. (This larger obstacle requires a 60” entrance way).

Model 904 Kidz Club Single Play House

This unit comes with:

- Climb Board
- Slide
- Circular Window
- Ball Drop
- Your Logo/Brand
- Chimney & Whimsical Gears

www.kidsfit.com

Model 901 “Kidz Club” Triple House Obstacle Course

Model 901 Triple House Obstacle Course

Each house is equipped with details such as gears, wood, stone, brick accents, skylights, chimneys and angled windows. House 1 starts the obstacle by requiring each child to climb into the whimsical playhouse. Bridge 1 creates a crawling obstacle as they move towards the next house. House 2 provides children the opportunity to use the ball drop that then creates incentive to crawl to the next house. House 3 requires the child to reposition their body in order to enjoy the slide area out of the house.

They can retrieve the ball and repeat the process. *Available with your facility logo integrated throughout the structures! (This requires a 35” door opening).

Model 596 Slide & Climber Unit

This all in one corner unit has it all- a 4 rung climbing challenge that leads up to a mini house platform that connects to a slide! Built with super duty materials. This unit is the perfect addition for any kids fitness facility.
*Protective flooring required beneath climber.

- Key Areas:
Creative Play Interaction
Motor Skills Development
Vestibular System

Model 563 Up-N-Over Rope Climber with Tunnel

This is the "just right challenge" for kids. Complete with climbing holds and knotted rope, each individual has the option of how they want to climb. Built in tunnel allows for exploring and added exercise! *Padded floor mats

- required.
Key Areas:
Balance
Coordination
Gross Motor Skills

Model 564 Free Standing Double Sided Net Climber

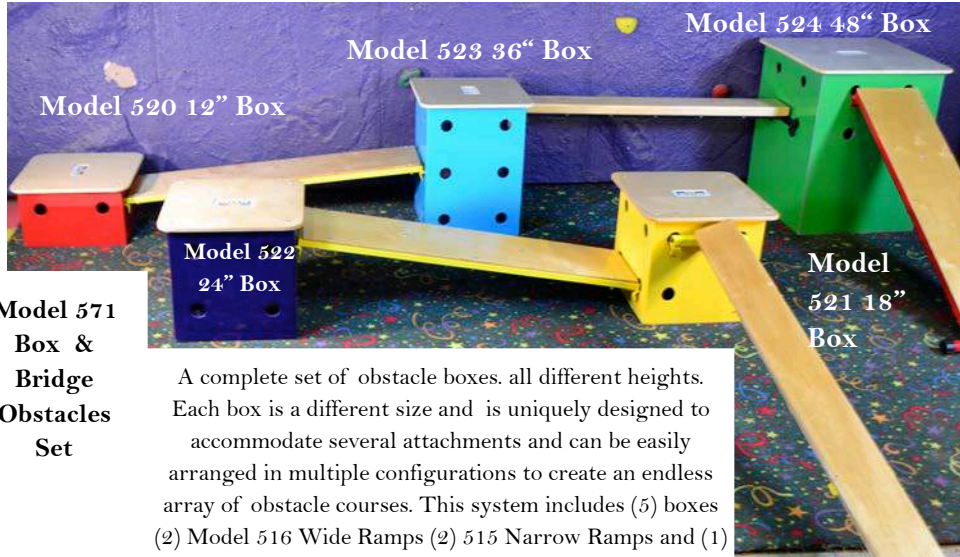

This fully adjustable system comes complete with safety mats. This net climber acts as a functional strength development tool for kids who just want to have fun! Facility operators can control the difficulty using a simple snap & clip adjustment system.

- *Padded floor mat required
Key Areas:
Balance
Coordination
Visual Perceptual Skills
Gross Motor Development

Obstacle Box & Bridge Systems

OBSTACLE BOXES

Model 571 Box & Bridge Obstacles Set

A complete set of obstacle boxes. all different heights. Each box is a different size and is uniquely designed to accommodate several attachments and can be easily arranged in multiple configurations to create an endless array of obstacle courses. This system includes (5) boxes (2) Model 516 Wide Ramps (2) 515 Narrow Ramps and (1) Model 517 Pivoting Balance Beam.

Model 521 18" Box

Model 522 24" Box

Model 520 12" Box

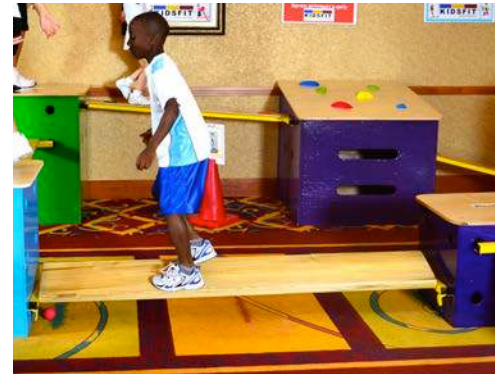

Model 570 Box & Bridge Obstacle Starter Set

This 5 piece starter set can be used for plyometric exercises as well as an addition to an obstacle course. Each box has several options for easy balance beam and connector attachments/. The perfect way for kids to climb, jump, and explore their environment. This set includes (1) Model 520 Box (1) Model 521 Box (1) Model 522 Box, (1) Model 516 Wide Connector Ramp & (1) 515 Narrow Connector Ramp.

Model 572 12" Add-On Box

ATTACHMENTS AND BALANCE BEAM

Model 517 Pivoting Balance Beam

The Pivoting Balance Beam fits into all of our Deluxe Obstacle Boxes. With slight motion from left to right, this balance beam gives users an added challenge as they cross from box to box.

Model 516 Wide Ramp Connector

The Wide Ramp is a great tool for enhancing the user's balance. It can be set up as a connecting bridge, an incline path leading to an obstacle box, or a decline path as shown to the right. Optional Hula Hoop addition is also available to give an added challenge.

Model 515 Narrow Wooden Connector

The Narrow Wooden Connector serves as the bridge between two obstacle boxes and enables kids to be challenged while improving their balance and coordination. The narrow base gives an added challenge to user's as it makes them learn how to compensate for a small surface area.

Model 574 Obstacle Box Set: 8 Boxes 10 Attachments

Model 574 Obstacle Box Set

*Pictured Above

- Includes: (8) Obstacle Boxes
- (1) Model 514 Ladder Attachment
- (1) Model 517 Pivoting Balance Beam
- (4) Model 516 Wide Ramp Connectors
- (1) Set of Hula Hoop Attachments
- (4) Model 515 Narrow Ramp Connectors

Model 575 Deluxe Obstacle Box Set

Shown to the right is the Deluxe Obstacle Box Set which also includes 2 Barrel jumps, 2 Hurdles, & 1 Set of Cones

Model 528 Obstacle Stepping Ladder

A fun way for kids to practice their color skills, listening skills, coordination and balance. Jumping, stepping, moving laterally and rapid hops are just a few of the ways kids can participate on the learning ladder! *For use while lying flat on floor only.

Key Areas:

Vestibular System
Visual Motor Coordination

Model 510 Balance Beam

Participants improve vestibular balance, movement coordination and concentration while understanding their body's center of gravity. The Balance Beam also helps to improve self-confidence, learning ability and sense of reaction. Each unit is equipped with the ability to add another beam on each end, thus allowing facility operators to make the beam as long as they need. Each additional beam can be positioned in multiple shaped layouts including circular, zig-zag, curved, etc.

Key Areas:

Balance
Proprioception
Visual Perceptual Skills

***Also available with optional add-on hula hoops and slalom step poles.**

Model 513 Balance Board Set of 3

Set of 3 pivoting balance boards develops balance and coordination. Children can rock from front to back and left to right.

Key Areas:

Balance
Reaction Capacity
Vestibular System

Model 522 Balance Arch

There are many ways to play with the Balance Arch, from creating half a circle and using it as an arch walkway, forming a full circle, or placing it on it's side. The balance Arch provides an array of challenges and training fun for kids. Ages 3 & up.

Key Areas:
Vestibular System
Coordination

Model 508 Suspended Swing & Frame

The Suspended Platform Swing accommodates 1-2 users while providing a firm base for movements. Steel enclosed frame makes it especially durable and padded beams make it a safe way for kids to have fun! The swinging motion is designed to stimulate the user's cerebral cortex. Age 4 years old and up.

Key Areas:
Sensory Input
Proprioception

Model 509 Platform Swing

Platform Swing is available as an optional add-on with Model 508 and can be easily changed out for the Motion Swing. The Platform Swing is a unique seated swing device that is manually controlled by the user or therapist.

Model 507 Green "Rockin" Turtle Shell

The Rocking Turtle Shell is designed with safety & fun in mind! The bottom has a smooth curve to prevent children from getting hurt when they rock from side to side.

Key Areas:
Vestibular System
Social Interaction
Teamwork

WISDOM WOODEN BOX SETS

Model 576 Wisdom Wooden Box Set
 Kids love to climb on the oversized Wisdom Wooden Box. With 6 different places to add attachments and configure your obstacle course it is sure to add hours of fun to your facility. The box is engraved with key words that encourage strong character such as responsibility, respect, caring and honesty.

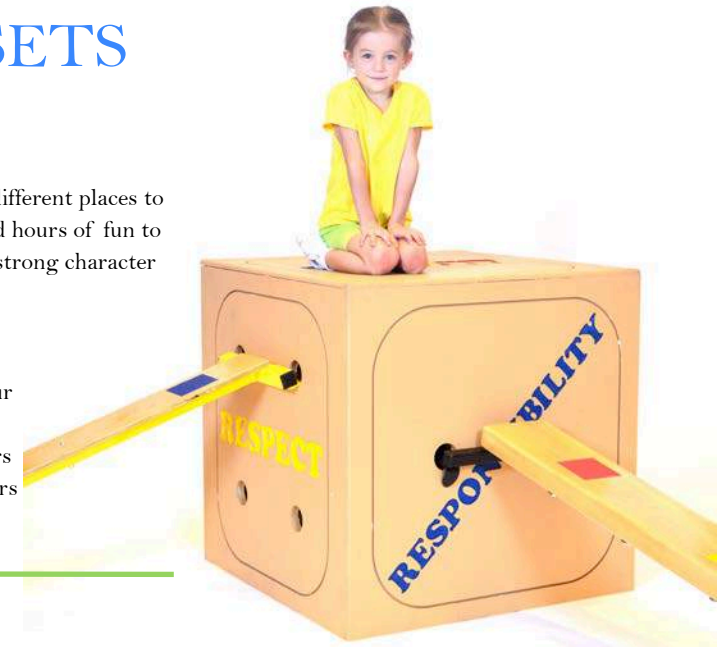

Package Options

Model 576A: Comes with 1 Wisdom Wood Box and four ramp connectors.

Model 576B: Comes with 2 boxes and 6 ramp connectors

Model 576C: Comes with 4 boxes and 10 ramp connectors

Model 576D: Comes with 6 boxes and 15 ramp connectors.

Model 524 (6 pieces) & Model 525 (12 pieces) Lilly Bridge Set

The curvy bridge board can be used to construct a humpback bridge or a reverse bridge, allowing children to practice the actions of walking or crawling up and down and to enhance their physical coordination, dexterity and balance. The process of making changes in island heights and creating different path combinations of the Water Lily system can help children cultivate spatial concepts and improve their action planning and problem solving skills.

Key Areas:

- Spatial Awareness
- Motor Skills Development
- Balance & Coordination

Model 555 Elevated Climbing Wall
 The elevated climbing wall gives children the chance to explore and learn about their environment while being appropriately challenged.

Key Areas:
 Tactile Perception
 Gross Motor Skills
 Vestibular System

Model 586 Animal Parade 8 Pieces

This 8 piece set includes a set of 2 dinosaur themed steps, 2 flying fish slopes, 2 seal themed wavy slopes and 2 square platforms. Soft, safe and comfortable material is perfect for young children. The Animal Parade stabilizes toddlers steps by training them to walk on the slope. Develops young children's motor skills such as crawling, walking and going upstairs/ downstairs, etc.

Key Areas:
 Motor Skills Development
 Exploration of the Environment
 Tactile Perception

Model 547 Crawl Through Tunnel

The tunnel is a fun way for kids to explore their environment while crawling and climbing. This is a great addition to any children's facility since it is easily portable and requires very little space (Set of 2).

Key Areas:
 Sensory Input
 Visual Motor
 Coordination

Model 521 Colored Rock Obstacle (6 pieces)

Helps to promote an interest in learning while simultaneously enhancing stimulation of vestibular balance. The Rainbow River stones can be arranged in a wide variety of unique ways. Children have a blast while working on their movement & coordination.

Includes 6 pieces.

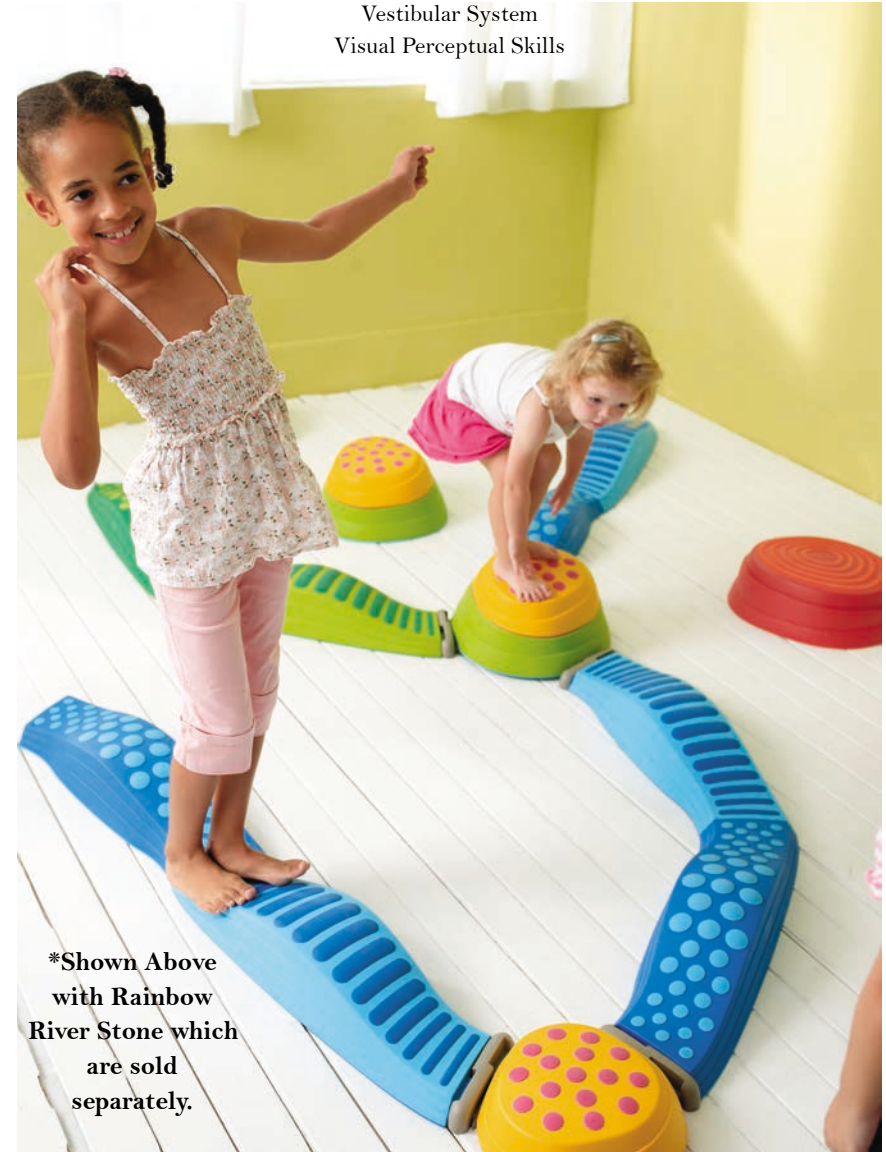

Key Areas:
Vestibular System
Tactile Perception
Spatial Awareness

Model 503 Tactile Stepping Pathway (8 pieces)

This 8 piece set can be arranged into curvy or linear patterns to provide users with multiple play arrangements. The slight slopes on the 4 sides of the board not only offer balance control for the front and back of the body, but also stimulate balance on the left and right sides of the body.

Key Areas:
Vestibular System
Visual Perceptual Skills

*Shown Above
with Rainbow
River Stone which
are sold
separately.

Model 578 Gear Action Platform

This unit lets patrons know that your facility is serious about active play and kids fitness! Your individual logo/brand and tag line reminds users that they have entered a special place. Kids love to create their own combinations of gear movement. The heavy-duty platform is stable but portable. Plastic parts are easily interchangeable.

Key Areas:

Tactile Stimulation

Teamwork

Problem Solving Skills

Fine & Gross Motor Skills

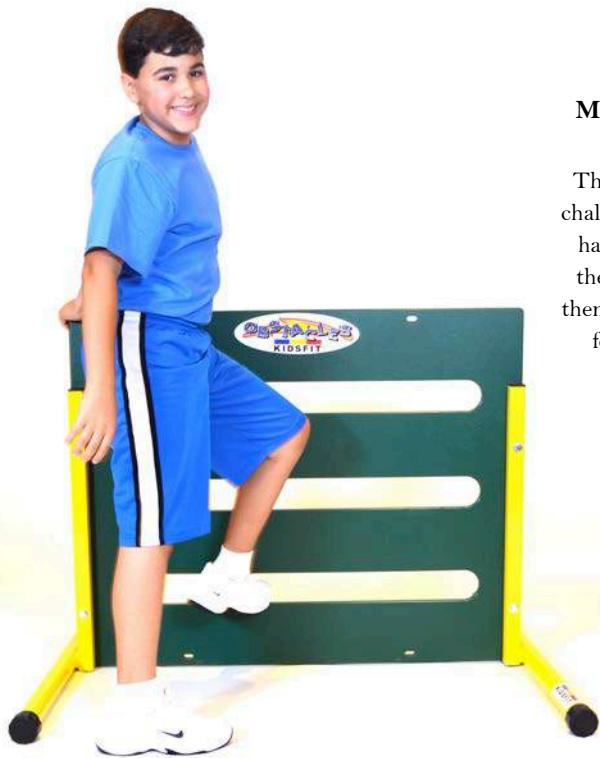

*Your Logo Goes Here!

Model 592 Sand & Water Table

The Sand & Water Table stimulates children's sense of touch and calms them down while enabling them to learn about the properties of sand & water. The tub can be lifted right out for easy cleaning and the lid fits snugly and easily on top of the tub. The lid can be used as a writing or drawing surface when filled with sand, or a storage shelf when placed underneath the tub on the rack. The water flow can be controlled by the drainage plug.

Model 559 Green Medium Hurdle & Model 560 Blue Tall Hurdle

The medium green hurdle creates a unique climbing challenge for kids. With 3 stepping rungs, participants have to use their balance and coordination to get to the other side. Using upper body strength to propel themselves forward, the hurdle is the perfect challenge for kids to help build foundational skills. Welded frames make these ideal for institutional use!

- Key Areas:**
 Balance
 Proprioception
 Upper Body Strength
 Gross Motor
 Visual Motor Skills

Model 560 Blue Large Hurdle

Model 542 Small Medium & Large Arches Set of 3

This set of 3 arches allows kids of all ages to practice their jumping and acceleration skills. Participants can increase their explosiveness and reaction time while enhancing coordination and agility. Walk through slowly for a warm-up or jump over all 3 for a fast paced workout. Each arch is equipped with rubber foot pads to prevent scratching of all floor surfaces. These welded units can handle up to 250lbs of weight!

PARALLEL CLIMBING BARS

Model 519 Set of 2 Parallel Bars

Set of 2 parallel bars allow kids to climb, balance swing, suspend, and sway—just to name a few! Kids can incorporate controlled body movements while playing on the parallel bars. *Also available separately.

- Key Areas:**
 Spatial Awareness
 Vestibular System
 Visual motor System
 Coordination
 Postural Stability & Control

Model 518 Floor Parallel Bars

The floor parallel bars allow the body to incorporate flexion and extension while improving upper body strength and posture.

- Key Areas:**
 Postural Control
 Stability
 Proprioception
 Strength

Model 546 Barrel Jump

Set of 2 big barrel jumps works on participants lateral jump, balance, speed, acceleration, reflexes and timing. Make your children the best they can be! Kids love using their imagination while challenging their body.

- Key Areas:
- Coordination
- Balance
- Timing
- Proprioception

Model 543 Jog In Place Trampoline

Time for kids to jump their way to health! This mini trampoline comes with a safety handrail. A great way to improve cardiovascular health and balance. It is the perfect piece of equipment for your jumpers!

- Key Areas:
- Balance
- Timing

544 Obstacle Jumps Set of 3

A great way to get a cardio workout while fine tuning motor skills, the Obstacle Jumps can be used as a stepping exercise or a high intensity trio of jumps. What makes this exercise so special is that it can be used for anyone. For smaller children and beginners it can be used as a tool to warm up and get adjusted with small movements. For more advanced exercisers, it can be a fast paced circuit of explosive jumping and cardiovascular challenges. Add it to your existing obstacle course or use it as a stand alone station! All welded construction. 250lb capacity!

- Key Areas:
- Reaction Timing
- Sequencing
- Coordination

Model 525 Platform Steps

The sturdy solid wood frame is the perfect way for participants to practice walking up and down, & side to side while enhancing their physical coordination, dexterity and balance development. One side of the stairs offers 3 large platform steps for increased stride length, while the other side offers 6 smaller steps to challenge balance & spatial awareness.

www.kidsfit.com

20

Model 514 Ladder Attachment

The ladder attachment is an add-on apparatus that fits onto the platform steps and obstacle course boxes. It offers users a unique way to improve motor skills as they are trained to walk skillfully up and down a gradual slope.

Model 545 Wood Plyometric Platforms (Set of 3)

This set includes 3 platform obstacles ranging from 6 inches to 10 inches to 14 inches. Each platform is powder coated in a bright primary color and has a colored non-slip grip surface. These units are ideal for strength, rehab and cardio classes for children.

Model 557 Bridge Over Troubled Water

The bridge to imagination starts here! This intricately designed bridge is filled with details including the life-like stone on either side of the bridge, a pool of water with alligators and frogs, and thick rope intertwined between sturdy beams. Children's imaginations will come to life as they use creative play and motor skills to traverse the bridge.

Key Areas:

- Motor Skills Development
- Tactile Perception

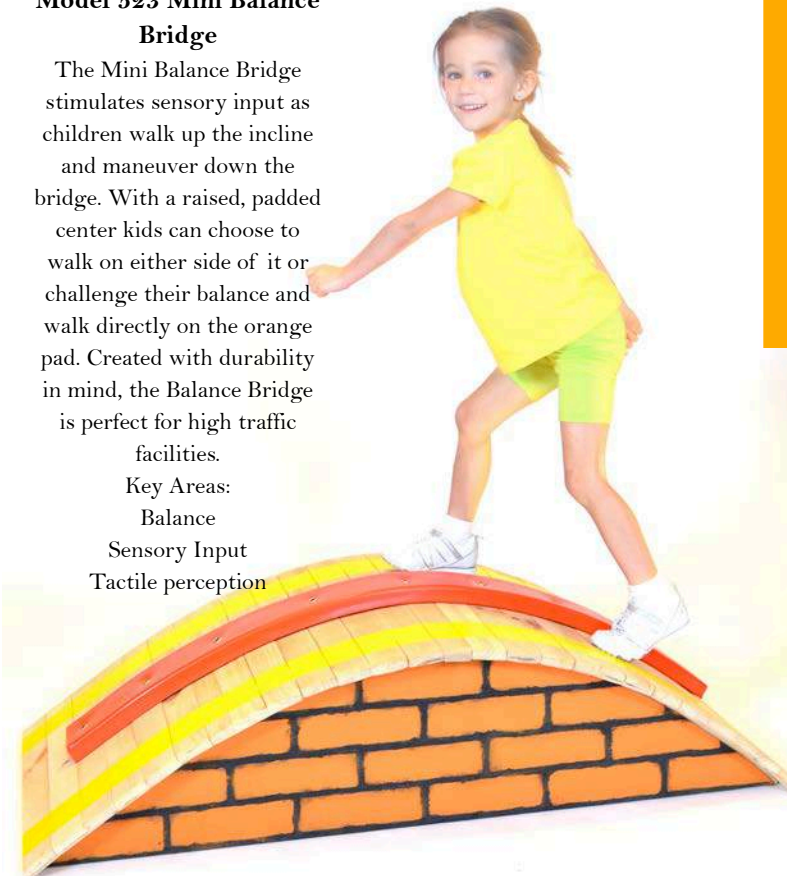

Model 523 Mini Balance Bridge

The Mini Balance Bridge stimulates sensory input as children walk up the incline and maneuver down the bridge. With a raised, padded center kids can choose to walk on either side of it or challenge their balance and walk directly on the orange padded pad. Created with durability in mind, the Balance Bridge is perfect for high traffic facilities.

Key Areas:

- Balance
- Sensory Input
- Tactile perception

Model 562 Incline Rope Bridge

The Incline Rope Bridge is a sturdy connecting apparatus that can be used with any of the box sets or as a stand alone floor level activity. Comes equipped with parallel side railings for safety and support. With it's fun design, kids are able to get from one point to another while working on motor skills and tactile perception.

Key Areas:

- Tactile Stimulation
- Motor Skills Development

GET YOUR HARD HATS READY... INTRODUCING THE BULLDOZER

Model 577 Bulldozer

This spectacular piece of equipment is a children's dream! Let their imagination soar as they climb, explore and control their very own Bulldozer. This life-size Bulldozer comes equipped with a tunnel, climbing platforms, a padded seat, gears and buttons to keep kids busy and active for hours. The Bulldozer allows kids to improve their motor skills, tactile perception, proprioception, and balance. Hand-made from wood, plastic and steel this unit is a "one of a kind" crafted piece of children's equipment!

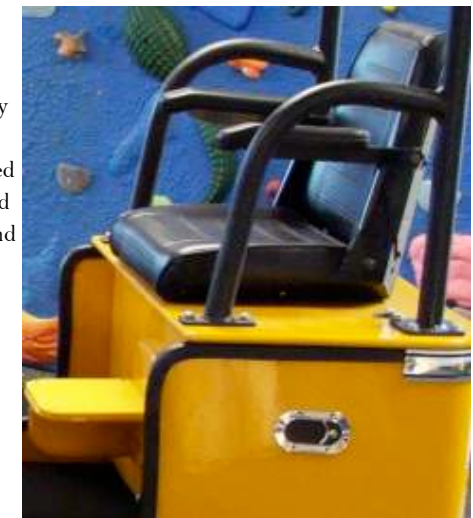

The Kidsfit Bulldozer has all the details of a real bulldozer from the exhaust pipe to the levers on the inside console.

Moveable joy stick and control panel equipped with buttons and multiple gages.

Comes fully equipped with elevated seat, padded handrails and safety support beam.

**Model 528
Veggie
Obstacle
Set of 5**

Model 527 Fruit & Veggie Obstacles Set of 3

Motivate kids to move and eat healthy! This set of 3 Obstacles acts as a balance station, a plyometric circuit and a mini obstacle course for kids! Life-like fruit and vegetable images make it extra appealing for children. Each piece is built for high traffic facilities and the set is easy to rearrange if needed. *Also Available in a 5 or 8 piece set. (Model 528 5 piece Set. Model 529 8 piece set).

Key Areas:

- Balance
- Reaction Timing
- Body Awareness

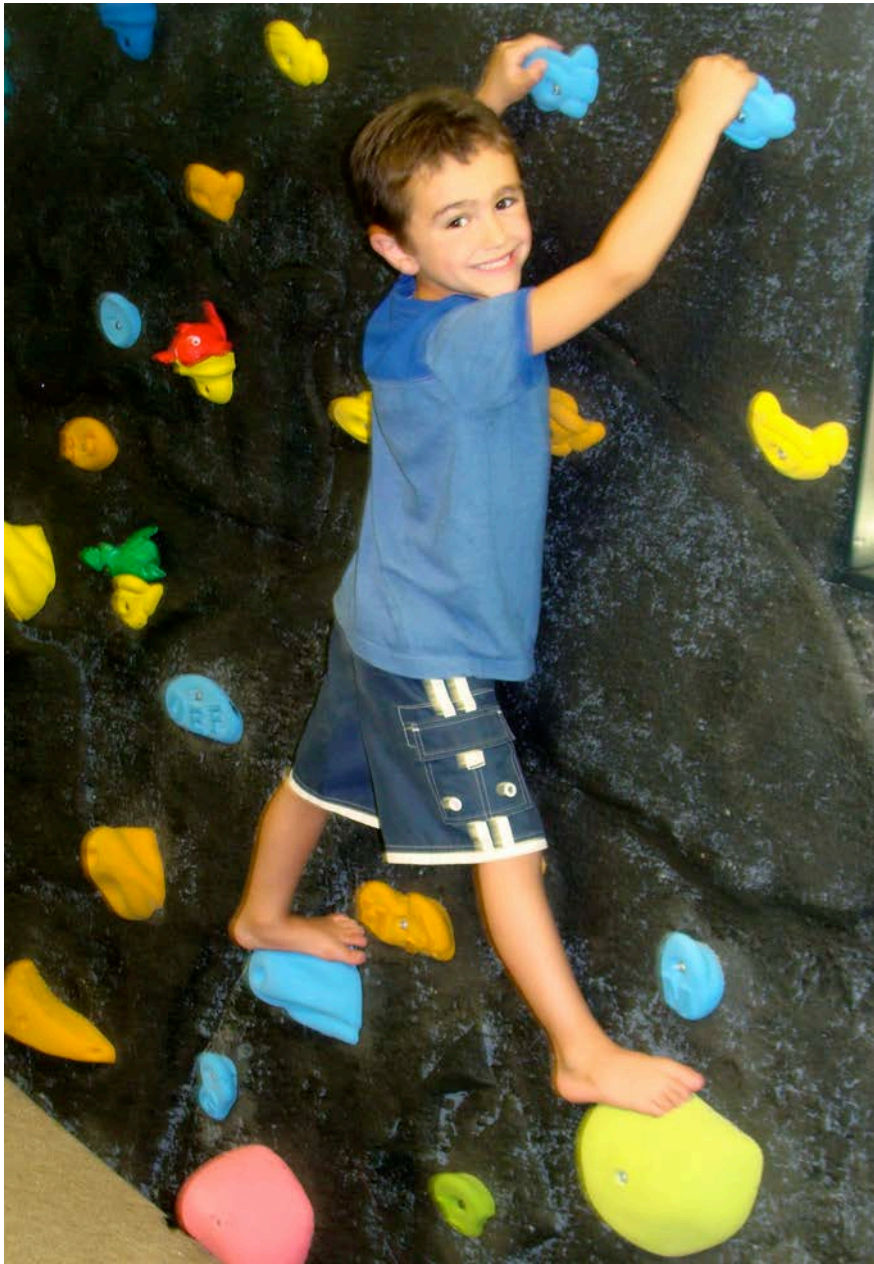

Model 585 Mushroom Obstacles

Mushroom Obstacles promote climbing and motor skills development. Four padded mushrooms sit atop a lush green grass pad which stimulates creativity and imagination in kids. Children can explore, crawl and climb over this obstacle as they learn how to stabilize their body weight and use their body in a controlled way. The frogs and lizards add to the fun!

Key Areas:

- Stability
- Balance
- Controlled Movements

Model 4600 Mini Climbing Wall

This 4 panel climbing wall comes complete with a multitude of hand grips and foot holds to support participants as they climb and scale the wall. Users can climb up the wall of from left to right for an added challenge. (16 x 6 x 4 ft panels).

Key Areas:
 Proprioception
 Motor Skills
 Stability

Front View

Back View

Model 4700 Free Standing Climbing Cave

A true favorite amongst kids, this climbing wall sparks kid's imagination while challenging their climbing skills. The back side is a large, creative mural of a backyard tree house scene and the front is a built-in climbing wall fully equipped with multi-sized foot holds and hang grips. Kids can be creative and active all in one! The Climbing Cave comes with safety floor mats and skylights.
