

Helping teachers succeed with digital learning

Classroom Internet management

Live student browsing visibility

Focus classroom Internet use

Student self-management

Educate digital citizenship

Classroom Internet management tools for teachers

Linewize enables teachers to gain control and visibility over Internet use in the classroom. Ensure your students' attention remains focused on education rather than entertainment.

On-task, off-task or off-line

Live visibility over student Internet use allows teachers to identify those students focused on the lesson and those whose attention has wandered. Linewize even identifies students who have chosen to take their device off-network to pursue their own activities.

Focusing Internet use

Linewize allows teachers to specify lesson related online resources and share them with students through the my.linewize.net website. Teachers can choose to restrict Internet access to specific sites and applications or relax default filtering policies for the current lesson.

Student self-management

When a student visits the my.linewize.net website they are shown a summary of their Internet activity. This activity is contrasted against the behaviour of peer students, allowing outliers to reflect on their own usage.

Educating digital citizenship

Student Internet access is a privilege. Linewize makes it easy for teachers to ensure that students are respecting this privilege by aligning their behaviour with the schools' acceptable use agreement.

Linewize Services

Service	Description
Classwize	Live visibility and control over in-class student Internet use for teachers Classwize provides teachers with complete visibility and control over class Internet use. Through the my.linewize.net website, teachers can share online resources and focus learning activities.
Surfwize	User authentication, user specific content filtering and individual usage reporting Surfwize provides user authentication, BYOD and guest device management. The linewize.net website provides self-management of content access policies by group membership and full visibility over browsing history and data usage for every user and device on the network.
Edgewize	Cloud managed firewall Edgewize provides cloud based management of the router and firewall functionality (NAT, VLAN, etc.) of the Linewize appliance when installed as the edge device.

Key Benefits

The complete solution for digital learning. Linewize provides full user authentication, configurable per user content filtering and full visibility of user browsing history and data usage for both fixed and mobile devices.

Support BYOD on your existing network. Linewize's transparent bridge technology instantly augments your existing network with touch-less BYOD support. No need for costly and disruptive hardware upgrades.

A better way to protect your students. Linewize helps schools to protect students online. Use Linewize to ensure content access is age appropriate and that student Internet use is visible to all custodians.

Personalised access for all network users. Linewize integrates with any existing directory service allowing Internet access to be individualised for students and staff based on the directory groups they belong to.

Google Apps for Education network login. Linewize integrates with Google OpenAuth so that students can use their Google account and password to log on to the school network.

Identify and alert inappropriate behaviour. Teachers and parents can be alerted should a child under their care attempt to access inappropriate content enabling immediate redress of the behaviour.

Set policy from knowledge not assumption. Powerful reporting allows you to understand how students are using the network and then set appropriate usage rules in response to actual use.

No IT expertise necessary. The easy to use linewize.net management website allows non-IT staff to manage BYOD support, web filtering and usage reporting without having to depend on external IT assistance.

Automatic weekly email reports. Linewize keeps you in touch with what is happening on your network with emailed weekly reports detailing filtering hits, most popular websites, network data usage and more.

Cost effective subscription service. Linewize is a cloud hosted subscription based service with no up-front hardware cost and an affordable subscription fee calculated from the school's published roll count.
