

Anatomy of a Worksheet

All Walkabouts have corresponding Worksheet sets. Worksheets are PDF worksheets that include a movement component. All Worksheet sets can be downloaded and printed.

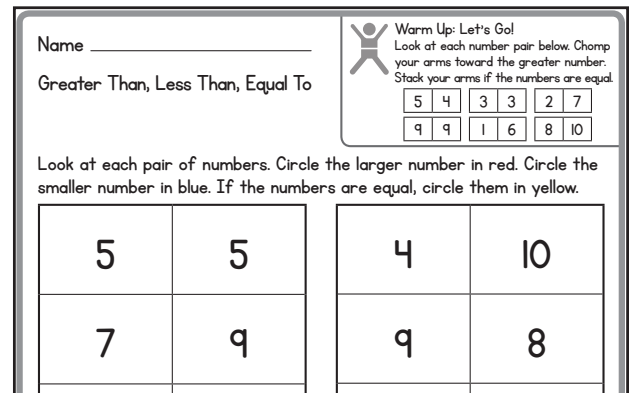

To find, view, and print Worksheets, click the light blue button on the Home screen.

Then, find the Worksheet set you want to view and print. You can locate the Worksheet set using the drop-down menus, or simply scroll and browse the Worksheet sets.

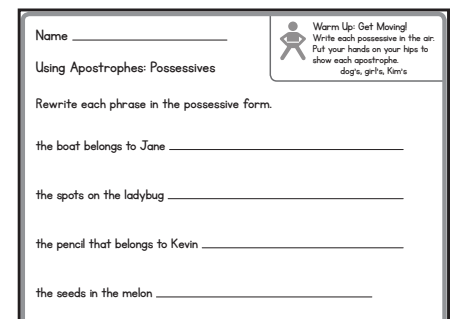

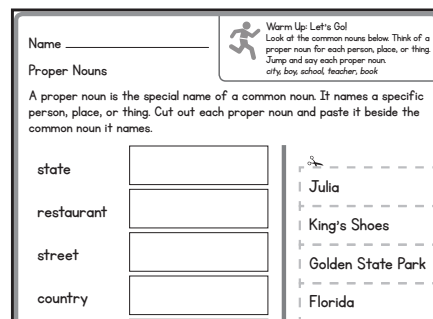

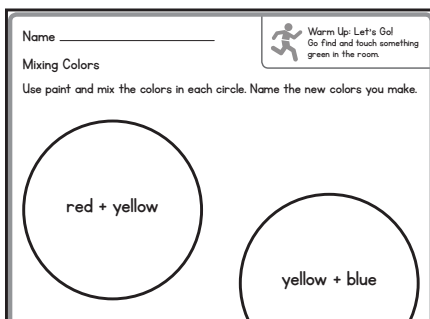

Next, scroll to view all the pages in the Worksheet set, or use the buttons at the top right to change the page orientation, download, or print.

Check the top right corner of each Worksheet for the warm up box. These warm ups use movements or actions to reinforce a skill presented on the Worksheet.

Many Worksheets go beyond the traditional. On some Worksheets, students color, cut and paste, and even paint. A few Worksheets even include games students can cut out and play to reinforce the skills presented in Walkabouts.

Applicable Worksheet sets include an answer key.
