

Bespoke Adds CAST's Software Intelligence to Help Accelerate Clients Digital Transformation Efforts

Paris and Antwerp - 17/03/2020 - CAST, the leader in [Software Intelligence](#), today announced a partnership with [Bespoke](#), a leading technology consultancy and ICT solutions company. The partnership will provide clients with greater visibility into large technology portfolios and deliver the objective metrics needed for informed decision-making throughout digital transformations.

Modernization is a challenge for many organizations; a process often wrought with roadblocks and IT complexities related to a lack of visibility into the application portfolio. To meet client demands regardless of where they are along their digital transformation journey, Bespoke provides a robust array of consulting offerings around cloud management, technology architecture optimization, and overall IT strategy.

"We are very excited to announce our partnership with CAST today. Combining our consulting services in digital innovation and architecture with the Software Intelligence solutions of CAST, we believe we can bring large added value to our customers in their transformation efforts. Bespoke will use CAST's unique Software Intelligence to safely accelerate and enhance our application modernization offerings by equipping us with better visibility and objectivity into complex software." said **Kevin Van Kerckhoven, Managing Partner of Bespoke**

Bespoke will leverage CAST's powerful "MRI for software" to enhance its existing consulting offerings around digital transformations, using facts to help clients understand software as a strategic enabler to the business and make it easier to visualize what IT changes can be made to build the spine for a truly digital business.

"Business and IT owners face the challenge of prioritizing modernization efforts, ensuring the application changes safely proceed at pace. That requires accurate intelligence about the Cloud readiness, internal architecture, and evolving condition of the software being modernized" said **Alexandre Charlet, Managing Director of Northern Europe at CAST**. *"The 'MRI for Software' from CAST automatically provides this type of intelligence and architecture visibility based on easy to understand, contextual analysis of all the data structures, code components and their interdependencies in critical business systems."*

About Bespoke

Bespoke is a leading consulting company in Belgium, part of De Cronos Groep, with specialization in digital innovation and architecture. We provide guidance and practical advice to customers who are embarking on a (digital) transformation journey and want to leverage technology to implement sustainable business change. Customers choose Bespoke for its hands-on approach towards IT architecture and governance. Bringing digital innovation to the core of the organization. Learn more at www.bespoke.archi.

About CAST

CAST is the pioneer and category leader in [Software Intelligence](#), providing insight into the structural condition of software assets. CAST technology is renowned as the most accurate "MRI for Software", which delivers actionable insights into software composition, database structures, architectures, critical flaws, quality grades, cloud readiness levels and work effort metrics. It is used globally by thousands of forward-looking digital leaders to make objective decisions, accelerate modernization and raise the security and resiliency of mission critical software.
