

Woven Wire - Deer/Game Fence High Tensile - Class 3, ZA or Black

Description -

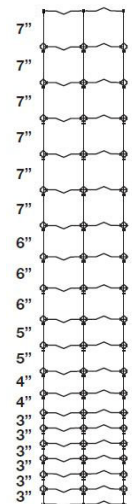

- Made in USA
- Knots will not unravel, break or slide
- One piece vertical stay wires give greater strength
- Stiff knots securely hold horizontal line and vertical stay wires together
- Strong deer/game fence woven from 12-1/2 or 14 gauge **high tensile** wire
- Fence will not sag or stretch under snow load or extreme temperature changes
- Crimps in horizontal wires allow fence to conform to terrain and absorb impact
- Three finishes, depending on style:
 - ~ **Galvanized** (Class 3) - 12-1/2 gauge high tensile horizontal and vertical wires
 - ~ **Zinc Aluminum (ZA)** - high strength 12-1/2 gauge horizontal wires, 14 gauge vertical
 - ~ **ZA + black paint** (Bezinal) - 12-1/2 gauge horizontal and vertical wires
- ZA finish: 95% zinc, 5% aluminum - lasts three times longer than Class 1 galvanized
- Bezinal finish - UV stabilized black paint over ZA - lasts longer than Class 3 galvanized

Benefits -

- Available in wide variety of heights for different farm animals and wildlife
- Fewer line posts needed with high tensile fences
- Class 3 and other finishes mean extra long life
- Low maintenance cost after installation
- Choice of different mesh opening sizes

Uses -

- Horse fence
- Sheep and goat fence
- Property boundary fence
- Orchard and vineyard fence
- Deer, wildlife and game fence

2096 style

Product information -
