

Integrated Solutions to Parts Sustainment

Defense Parts Direct®, a service of CMTC, provides solutions for difficult to obtain parts required for the sustainment, modernization, and upgrade of legacy defense systems – aviation, land, and maritime.

Our integrated approach to parts sustainment encompasses all the elements required to develop a solution – from the initial need identification through parts delivery. A Defense Parts Direct® solution incorporates four essential elements:

- **Comprehensive Engineering**
- **Thorough Qualification**
- **Agile Manufacturing**
- **Assured Delivery**

Reverse engineering, technical data package development, first article build, testing, qualification, and manufacturing via our manufacturing network are incorporated in a project management framework to meet customer requirements. Our team of project engineers responds to requirements by providing the right mix of engineering and manufacturing capabilities.

Proven Capability for Fast Response

Defense Parts Direct® provides engineered and fully qualified first article parts within several weeks to a few months from the *time of request*. A proven parts provider for military aviation, land, and maritime systems, Defense Parts Direct® has successfully reverse engineered, qualified first articles, and delivered certified parts for military and aerospace customers including: U.S. Air Force, U.S. Navy, U.S. Army, U.S. Marine Corps, Defense Logistics Agency, and BAE Systems.

Parts delivered include: avionics assemblies, electrical wiring harnesses, structural components, and mechanical items.

Multiple Manufacturing Sources Ensure Long-Term Viability

A Defense Parts Direct® solution brings *multiple* manufacturing sources to bear on a diminished manufacturing source problem ... a solution that works over the long-term. Typical approaches to obsolescence parts issues utilize an alternate single-point manufacturing source, an approach that often results in only a short-term fix. A part qualified by CMTC's Defense Parts Direct® team is one that you can consistently count on to be available over the long-term – our Integrated Manufacturing Network approach with multiple manufacturers makes this possible.

About CMTC

A private, non-profit corporation, CMTC was established in 1992 and is affiliated with the National Institute of Standards and Technology's (NIST) Hollings Manufacturing Extension Partnership (MEP). CMTC's Defense Parts Direct® service fully leverages the aerospace and defense manufacturing supplier base in California. With over 5,000 manufacturers, it is the nation's largest and most diversified defense manufacturing resource.
