

To Whom It May Concern:

We installed three of the SW2250A Covert Cameras around the store and one by the registers to look see why the cash was short in the drawer. Not long after installing the cameras we found the employee responsible for the money that was missing as well as we also found a customer stealing from the shop in the back. The cameras looked just like smoke sensors and the quality of the cameras where clearer than I expected for the cost. We will definitely use this product again.
