# technology

**Oracle Business Intelligence Business Objects** 

Achieving cost savings by converting from Business Objects to Oracle Business Intelligence Enterprise Edition

#### **About Bank of Hawaii**

Bank of Hawaii Corporation is a bank holding company providing a broad range of financial products and services to customers in Hawaii and the Pacific Islands (Guam, nearby islands and American Samoa). The Company's principal subsidiary, Bank of Hawaii, was founded in 1897 and is the largest independent financial institution in Hawaii.

#### Challenges

Bank of Hawaii was challenged with the substandard flexibility and complexity of maintaining multiple instances of Business Objects. There was a high cost of ownership with a hosted implementation of the Business Objects tool.

#### Solution

Bank of Hawaii made Oracle BI its enterprise standard, working with KPI Partners to convert its Business Objects applications to Oracle Business Intelligence. In total, over 80 reports and 5 Business Objects universes were converted using KPI's industry-leading BI conversion methodology and technical expertise with Business Objects to Oracle BI conversions.

#### Value To Bank of Hawaii

A hosted implementation of Business Objects was costing Bank of Hawaii more than other analytics solutions and was not giving them the functionality they needed. KPI Partners converted 80 Business Objects reports and 5 universes to OBIEE in 5 weeks. The result was a lower cost of ownership (TCO) and the agility Bank of Hawaii needed to support user needs quicker than the previous solution.

"With Oracle BI, the Bank of Hawaii now has the agility they need to better serve their users."

- Norman Dy, Business Development Director **KPI Partners**
