

## iTrak<sup>®</sup>

## Best Practices Module

### Flexible

- Integrates seamlessly into the iTrak desktop
- User friendly designer for managing and loading best practices
- Module specific best practices
- Daily log, incident file, subjects and personnel module support
- User definable best practices

### Cost Efficient

- Client/server architecture provides a single centralized database for multiple properties
- Reduces time and resources to manage and maintain outdated paper manuals

### Powerful

- Multiple key word searching
- Real-time best practice updates
- Information can be loaded from Word and other formats
- Ability to search policies and procedures easily throughout multiple modules
- Available to all iTrak users

In today's large multi-departmental company environments, managing, publishing and maintaining company best practices, policies and procedures can be an arduous task. Security, safety, human resources and other personnel tasked with maintaining paper manuals must deal with a process that is time consuming, expensive and outdated.

The iTrak Best Practices Module provides an online centralized repository to load company best practices, policies and procedures, safety and other workplace information from Microsoft Word and other formats. These in turn are immediately available to all iTrak users on the system with no requirement to maintain, print, copy and ship paper manuals.

The iTrak Best Practices Module allows for event specific policy and operating information to be loaded and maintained in a format that end users can access and search to determine and follow standard company procedures within the iTrak daily log, incident file, subject and personnel modules.

The Best Practices Module can be used to maintain, organize and publish Company Best Practices, Policies & Procedures (P&P), Standard Operating Procedures (SOP), Information Classification & Management (ICM), Workplace Safety & First Aid Information, Material Safety Handling Guidelines, Emergency Contact Information and more.

When a major event takes place within a corporation, it can be logged and dealt with appropriately, as company best practices are available while reporting on the event within the iTrak environment for quick and easy reference.

Anything that is pertinent to the company from a reference or policy perspective can be maintained and easily searched so that any event that occurs is dealt with and documented to company standard guidelines. This ultimately increases policy and procedural adoption, awareness and implementation by relevant employees.

In today's complex multi-departmental operations, maintenance, storage and dissemination of standard operating procedures is extremely expensive and difficult. The iTrak Best Practices Module provides a modular solution for risk management environments, ensuring timely access to accurate best practises information.

## REQUIREMENTS

### iTrak Client Software

- Microsoft® Windows 2000
- Microsoft® Windows XP
- Microsoft® Windows 7
- Internet Explorer 5.5 or higher

### iTrak Client Hardware

- Pentium III 800MHZ or higher
- 512 MB RAM (1 GB recommended)
- 100 MB available disk space
- SVGA Monitor capable of a minimum of 800x600 resolution
- Network Card (Networked installations)
- DVD-ROM Drive
- Mouse

### SQL Server Software

- Microsoft® Windows 2000 Server
- Microsoft® Windows 2003 Server
- Microsoft Windows 2008 Server

### SQL Server Software

- Pentium 4 2.0 GHz or higher
- 1 GB RAM (2 GB recommended)
- 350 MB available disk space
- SVGA Monitor capable of a minimum of 800x600 resolution
- Network Card (Networked installations)
- CD-ROM Drive
- Mouse

### Microsoft® SQL Server™ 2000

- Microsoft Windows ® 2000 Server
- Microsoft SQL Server 2000 installed

### Microsoft® SQL Server™ 2005

- Microsoft Windows ® 2000 Server
- Microsoft SQL Server 2005 installed

### Microsoft® SQL Server™ 2008

- Microsoft Windows ® 2000 Server
- Microsoft SQL Server 2008 installed

\* SQL licences are not included in the price of the software.
