Re: Destiny 1500 revised rating to a full 1HPc

The Overhead Door Company is making strides to provide customers with the newest in product innovations and the latest in enhanced technological features.

We are pleased to announce our performance enhancement to the Destiny 1500, DC Direct Drive Screw garage door opener. This unit was previously rated at a $\frac{3}{4}$ HPc* Power Plus unit. Through further testing and validation, this unit has **passed the requirements** for a full 1 HPc unit, meaning that the Destiny 1500 at 1 Horsepower comparable (HPc) meets Overhead Door's lifting force specification for a 1 horsepower garage door opener.

The four page specification sheet and the sell sheet for the Destiny 1500 will be updated as a running change. The carton artwork will also be updated as a running change as well to reflect the 1 HPc rating.
