

ENow's Mailscape Named Best Exchange Reporting Tool

Los Angeles, CA - January 26, 2011 - ENow, a Microsoft Gold Certified Partner specializing in infrastructure consulting and development of software to simplify Exchange system management, announced today that its award-winning solution Mailscape, was selected as the winner in the Exchange Server Reporting category of the MExchange.org Reader's Choice survey.

ENow's Mailscape Exchange Server product features a dashboard with red, yellow, and green lights indicating the health of each monitored server. The Mailscape solution enables IT support staff the ability to proactively monitor servers in real time. It also provides mobile device reporting for iPads, iPhones, Androids, Blackberries and other mobile devices.

MExchange.org conducts regular polls to discover which product is preferred by Exchange administrators in a particular category of third party solutions for Microsoft Exchange Server. The awards draw a huge response per category and are based entirely on the visitors' votes.

"We are extremely pleased to receive this award for Mailscape, particularly since it's coming from the leading Microsoft Exchange Server resource site," states Jay Gundotra, CEO of ENow. "Our team really takes pride in listening to the IT administrators who purchase our product and have created a management tool with them in mind. To receive an award from those individuals 'the readers' of the MExchange.org site is a true honor and testament to our end users belief in our product."

"Our Reader's Choice Awards give visitors to our site the opportunity to vote for the products they view as the very best in their respective category," said Sean Buttigieg, MExchange.org manager. "MExchange.org users are specialists in their field who encounter various solutions for Exchange Server at the workplace. Their vote serves as a solid peer-to-peer recommendation of the winning product."

This is the second coveted award that Mailscape has received in the past 2 months. Recently Mailscape was named the Gold Medal Winner of the "2010 Editors' Best Awards" in the Best Messaging category by Penton Media's Windows IT Pro Magazine. This new award wins the Exchange Reporting category of the MExchange.org Readers' Choice Awards.

About Mailscape

The award-winning Mailscape solution is a complete systems management tool that combines key elements for Exchange monitoring, reporting and administration into a single solution. Mailscape's innovative reporting module and robust monitoring features, coupled with a personalized dashboard, provide Help Desk and other key personnel with the ability to quickly diagnose a problem and deliver critical information needed to manage Exchange proactively and avoid costly downtime.
