Lake Arrowhead Resort & Spa

Size: 42,000sf

Location: Lake Arrowhead, California

Challenge *Aging Single Ply Roof*

- Numerous Leaks
- Occupied residences
- Typical single ply membrane weathering
- Partial Tear-off required

Solution *AcryPly Roofing System*

- Superior waterproofing and reinforced seams
- Avoided complete tear-off and disruption
- Improved building comfort for resort visitors
- Leak Free
- Sustainable roofing

The Lake Arrowhead Resort and Spa was built 1981 and recently had their roof restored with the National Coatings' All Acrylic AcryPly Roofing System. The aging roofs were leaking and needed to be replaced. Environment Roofing & Waterproofing, Inc. did a complete tear-off and installed a new capsheet roof with National Coatings' highly reflective "Sand" colored coating. The building owners can avoid future tear-offs with the renewable and sustainable AcryPly Roofing System.
