TEKTRONIX

Size: 38,000 Square Feet

Location: Grass Valley, California

Challenge *Aged Hypalon® Roof*

- Typical Hypalon membrane weathering.
- Some scrim exposure.
- Some checking at seam areas.

Solution *AcryPly® Roofing System*

- Reinforced seamless overlay.
- Avoided tear-off and disruption.
- New fully-adhered Cool Roof waterproofing membrane.

Tektronix benefits from continued Cool Roof protection by essentially overlaying their degraded Hypalon roof with the equivalent of a reinforced, seamless and fully-adhered single-ply.
