BLUE DIAMOND GROWERS

Size: 64,000 Square Feet

Location: Sacramento, California

Challenge *Exposed smooth BUR membrane*

- Exposed smooth built up roof with deteriorating asphalt.
- Wall flashings prematurely degraded.
- Excessive membrane surface temperatures.

Solution *AcryShield® Restoration System*

- Verified 90°F roof surface temperature drop at 86°F ambient.
- Extended roof life an additional 10 years.
- Reduced energy consumption in cold storage facility.

Blue Diamond highlights how a Cool Roof system can avoid an eventual re-roof, extend roof life, improve the efficiency of underlying insulation and save energy.
