Hundley Hardware Co.

Size: 10,300 Square Feet

Location: San Francisco, California

Applicator: D.C. Taylor Company

Consultant: Independent Roofing Consultants (IRC)

Challenge *Aging, Leaking Metal Roof*

- Aged metal roof leaking
- Occupied business
- Custom colors needed
- Multiple roof levels

Solution *AcryShield Restoration System*

- Superior waterproofing and reinforced seams
- No business disruption
- Custom tinted coating matched existing building scheme
- Leak Free

E.M. Hundley Hardware Company's building was an aging metal roof system, over twenty years old, that was revealing inconsistent nuisance leaks to the interior sales floor. IRC specified a National Coatings AcryShield® restoration coating system consisting of a localized, reinforced two-coat, 100% acrylic elastomeric custom color coating system with polyester fabric reinforcement at all metal panel end joints. "National Coatings makes this approach feasible not only with excellent coating products but also with the wide range of accessory products from rust-inhibitive primers to individual butyl caps to encapsulate the existing panel fasteners."

- Project Manager Mr. Rob Worthing.
