

Profile

MCI WORLD COM

Size: 38,000 Square Feet

Location: San Francisco, California

Challenge *Leaking BUR Capsheet Roof*

- Leak problems over critical facility.
- Multi-story building in congested urban area.
- Wall waterproofing & tie-in to roof problematic.

Solution *AcryShield® SPF Roofing System*

- No disruptive tear-off required.
- Seamless system tying walls to roof field.
- Efficient equipment and hose staging.
- No more leaks.

MCI WorldCom went with AcryShield SPF to avoid typical waterproofing deficiencies and short roof lives that they experienced with traditional built-up roofing.
