

Profile

APPLE COMPUTER

Size: 28,500 Square Feet

Location: Cupertino, California

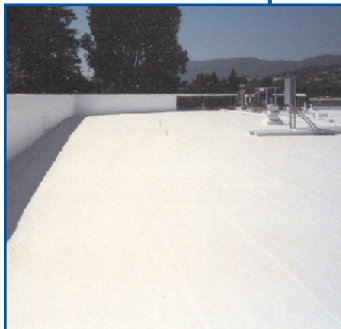

Challenge

- Aging asphalt BUR.
- Numerous leaks at screen supports.
- Drainage problems.
- Underinsulated building.

Solution *AcryShield® Restoration System*

- Reinforced Cool Roof restoration.
- Improved waterproofing at supports with SPF.
- Increased energy efficiency

Apple Computer highlights the strategic use of SPF in Cool Roof restoration systems to eliminate deflected areas and waterproof penetrations.
