

Profile

Lihue Airport

Size: approximately 146,875 Square Feet

Location: Lihue, Hawaii

Challenge *Aged Metal Roof*

- Multiple leaks
- Occupied business, open 24/7
- Custom color needed - dark green
- Multiple roof levels
- Sloped Roof

Solution *AcryShield® Restoration System (ARM)*

- Superior waterproofing
- Excellent reinforcement for seams
- No business closure or disruptions
- Custom tinted coating - Deep Jungle Green
- Leak Free, seamless roof

Lihue Airport is the primary airport on the Island of Kauai. Lihue Airport chose the AcryShield Restoration System by National Coatings to not only waterproof the metal roofs, but to change the color of the existing roofs. They chose a deep jungle green to match the vibrant and beautiful green scenery surrounding the airport. The airport is the primary gateway to Kauai for visitors so there could be no business disruptions or closures during the application process.
