

OPERATOR CONNECT

YOUR VIRTUAL OPERATOR

Busy schedules, multiple time zones and roving staff can be managed by utilising operator-assisted conference services. Our operators will ensure your meeting starts on time with all participants in attendance.

Why use an Operator Connect?

- Start your meeting on time – there’s no waiting while guests find their meeting information, as they are connected directly into the conference by an operator
- Increased professionalism – all guests enter on time and are announced by the operator when joining. This ensures everyone knows exactly who is in the conference.
- Connect guests from anywhere in the world – if they can access a phone, they can be joined into the conference. No need for them to remember when and what to dial.
- Increased security – eliminate the need to distribute dial-in numbers and access codes. You control who joins the conference.

Optional Features

- Guest entry on mute
- Participant name announce
- PIN security
- Auto record
- Auto disconnect
- Participant count
- Conference quickstart
