

Specialty Technical Publishers
PRACTICAL COMPLIANCE & AUDIT SOLUTIONS

In Partnership With

U.S. Domestic and International EHS Audit Protocols

**Series of 20 United States EHS Audit Protocols covering
Environmental, Health & Safety, Transportation,
Industry-specific, Federal and State Differences.**

**As well as a Series of over 30 Country-Specific EHS
Audit Protocols, each with 17 Individual Topic Modules**

introduction

Specialty Technical Publishers (STP) and Gensuite have worked together since early 2003 to provide domestic United States EHS Audit protocols to North American corporations through their global EHS platform.

This partnership has now expanded to include a series of more than 30 country-specific global EHS Audit protocols that are well proven by over 60 multi-national corporations worldwide.

Both the U.S. and International EHS Protocols are used by Corporate EHS Attorneys and Risk Managers, EHS directors and Auditors across many industry sectors, and consulting companies.

With new EHS regulations around the world increasing compliance and disclosure obligations for businesses, the time and resources required to understand and comply with these complex regulatory requirements across national or state/provincial borders has a growing impact on businesses' financial performance.

Gensuite is dedicated to providing solutions to enable EHS excellence, unique application customization, quick deployment, and focused support to ensure an easy approach to your regulatory and compliance issues.

According to Steve Britten, Acting President of STP:

"Our partnership with Gensuite offers excellent and practical interpretive material, written by consultants out "in the field" and delivered in the highly regarded Gensuite system. This is the ideal combination for any corporation needing both U.S. domestic and/or international compliance and audit guidance."

R. Makund, Founder and CEO of Gensuite, adds:

"By integrating STP's global and U.S. EHS Audit protocols with Gensuite's Power Audit Tool, we provide our subscribers with a ready-to-launch compliance auditing solution, that ties in seamlessly with the rest of the Gensuite solution; and that extends into our Mobile-enabled platform and auditor solutions."

benefits

Gensuite Platform

- Web-based Solutions-as-a-Service, requiring no customer-side hardware/software installation or hosting
- Tested and proven globally by the entire Gensuite community
- Shared solution representing synergistic, best practice programs
- Provides innovative Solutions-as-a-Service model that overcomes off-the-shelf applications
- Continuous evolution and upgrades – “stay on the cutting edge”
- Rapid response through dedicated support team and rich domain experts with deep understanding of process operational needs
- Intelligently integrated global and US EHS audit content available.
- Provides flexibility in module selection and customizable configuration options
- Can include company-customized EHS content
- Easily record audit results, sort findings.
- Enables auditors to rapidly collect, share, export audit findings in one document for each audit question and generate “at-a-glance” corrective action reports.

STP EHS Audit Protocols

- Facilitates demonstration of due diligence to mitigate risk
- Help avoid regulatory citations and fines
- Proprietary Applicability Tables for both U.S. and International jurisdictions facilitate determination of the regulatory requirements, by Topic and Subtopic, that apply to a specific business operation or practice.
- Pre-audit Preparation documents for review prior to conducting the audit save time and ensure thorough evaluations
- Guide Notes for the Auditor expedite the audit and assessment process

WHO USES THE PROGRAM?
