Chicago, IL, August 2, 2012 – PositiveVision, a full service consulting firm specializing in business software and support for small and medium sized businesses, celebrates 10 years of service.

Over the last decade, PositiveVision has helped numerous companies take advantage of all that technology has to offer. Staying abreast of industry trends, they continuously strive to ensure their clients are operating at maximum efficiency. Robert Baran, Founder and President of PositiveVision comments, “We don’t believe in implementing software for the sake of giving a company the latest and greatest technology available. Rather we apply world class systems and industry best practices in order to help our clients become productive, competitive and profitable.”

PositiveVision is greatly valued by those who engage their services and support. Many have expressed their gratitude towards having a business partner like them.

“The team at PositiveVision is trustworthy, honest and there when you need them. We know that we can rely on them to keep us informed of new and changing technology and that they will only recommend what we truly need. Thank you for being there for us, and we wish you the best of luck in the future!” – Bill Sliwa, CFO, Bernard Food Industries, Inc.

“When we first met the PositiveVision team we were immediately impressed with how they asked us questions, rather than telling us what they could do. They wanted to know about our business and what *we wanted* to accomplish and then helped us achieve our goals. This was so impressive because it showed us that they truly cared about our organization. We are thankful for your commitment to us, and for our ongoing partnership. Here’s to another 10 years!” – Bernie Tucker, AirTek.

About PositiveVision:

PositiveVision is a full service consulting firm specializing in the implementation and support of business management software for small to medium sized businesses. By leveraging out of the box technology PositiveVision assists clients in streamlining inefficient processes, growing revenue streams and reducing costs. As a result, their clients are more productive, competitive and profitable. PositiveVision’s goal is to improve the performance of businesses and be a long term partner by providing resources and expertise needed along with exceptional customer service.
